

# Ladders made entirely of fibreglass

## EF/C

### Two-section extension ladder using a cord

- ✓ Rope-extendable two-section fibreglass ladder
- ✓ Rails and rungs entirely in fibreglass.
- ✓ System actuated by rope and pulley to deploy the second section, for ease of use by operator.
- ✓ With top wheels for ease of movement.
- ✓ Swivel feet as added safety element.
- ✓ Solid rungs for those most susceptible to wear and tear, increasing ladder's durability (first section of base part and last section of extendable part).
- ✓ Rung marked in red as per EN-131 standard to indicate highest rung limit and not for use.

Code	Ref.	Height (mm)		Width (mm)	Steps	Weight
		Folded	Extended
