SHARING EXPERTISE

# Flexima® 3S: as simple as it gets!

As part of the latest generation of coupling systems, Flexima® 3S is:

**Simple:** it guides into position for you!

- **Right positioning from the start:** 3 easy fitting steps
  - 1 Insert the pouch tab into the base plate slot
  - 2 Clip the bottom of the ring and slide it up on the other
  - 3 Lock the pinpoint to secure the system
- **No education required:** intuitive guiding appliance
- **Multiple orientation:** 3 possible pouch positions according to the body configuration

*The guiding system will completely revolutionize the patient's life: the insertion of the guiding tab into the slot is very intuitive.*

« No need to think twice!

## Secure: it gives you confidence!

- **Enhanced leak proofing** thanks to the close fitting mechanical coupling system
- **Extra security feeling** strengthened by an audible click and a final locking system
- **Optional belt fixation**: 3 hooks on the pouch add stability when needed

« *The system is extremely safe. It's easy to fit, no leakage between the baseplate and the pouch. The possibility to use a belt is very handy.*

## Soft: it feels like part of you!

- **Minimum pressure on the abdomen:** the floating flange prevents from discomfort at application
- **High degree of comfort:** flexible when base plate and pouch are coupled together
- **Optimized body fit:** new generation of plastic material allowing great discretion

« *It is simply perfect. It is flexible, as much as a 1-piece system can be.*

# Flexima<sup>®</sup> 3S: security in motion.

**NEW**

## A secure convex base plate for flush or retracted stomas

- **Gentle convex slope** for an optimum pressure display
- **6 mm depth** together with a large base for an efficient protrusion
- **Floating flange** to prevent any discomfort at application

### 3S BASE PLATE CROSS-SECTION VIEW

- **Flexima® 3S Convex base plate** has been designed to capitalize on the benefits of Flexima® Key and mechanical 2-piece coupling systems: it ensures **enough flexibility** while providing a **sufficient level of pressure** on the peristomal area.
