Explosion Proof Alarm Bell
SBE130/ SBE150

| Ex | IP56 | -40~60℃ | BELL | 95dB | RoHS2 |
Thank you for purchasing Qlight's products. Please read this user manual carefully prior to installation and operation to ensure safe and correct use.

⚠ Safety Precautions for Explosion Proof Products

Please follow the instruction below to ensure safe and correct use of explosion proof products.

1. Explosion proof products should be managed according to explosion proof regulations. Do not disassemble, assemble, alter or repair the product arbitrarily.
2. The temperature rating of the product is the temperature the product will experience at the applied rated voltage and ambient temperature indicated.
3. Use cable glands that satisfy the product's explosion proof grade and temperature grade.
4. Unused cable entries must be filled with material that meets the explosion proof grade and temperature rating.
5. Before installing the product, please make sure all cautions indicated on the labels, packaging, and operation manual of the product are fully understood.
6. Installation, maintenance and repair of the product must be performed by experts in the explosion proof field, or persons who have received relevant training.
7. For safety, the product should be installed and operated in environments that avoid high temperature and high pressure.
8. Please follow general safety precautions and avoid installing the product in locations that may generate excessive heat.
9. When installing the product in places where chemicals are located, please make sure that the environment does not have two or more incompatible chemicals mixed. For safety, please read the instruction manual carefully and be mindful of the chemical compositions where the product is used.
10. This product requires grounding.
11. Please note that special conditions shall be applied if the sign "X" is placed after the certificate number.
    1) For safe use, regular overpressure test must be carried out in accordance with EN 60079-1, clause 15.2.3.
    2) For safe use, tempered glass must be protected from strong impact
12. When using NPT cable glands (plugs), it is recommended to use them after applying non-hardening grease to maintain protective performance.

⚠ Precaution for Safety

Failure to follow the instructions below may cause a loss of life or serious physical injury.

1. During wiring or maintenance, please completely turn off the power of the product. (Failure to follow this may lead to an electric shock.)
2. Do not install the product in locations that subjects it to excessive dust or water other than the conditions designated by the IP protection ratings indicated for each product. (Failure to follow these instructions may cause a fire to the product, electric shock, physical injury, malfunction or damage to the product.)
3. Do not alter or repair this product. If maintenance or repair service is required, please contact your local Qlight contact point. (Failure to follow these instructions may lead to fire, electric shock, or product damage.)
4. Please apply the correct voltage to the product. (Failure to follow these instructions may lead to fire, electric shock, or product damage.)
5. When the product is applied to a condition that may impact lives or property, please make sure to have a double safety device. (Failure to follow this may cause damage to property, fire, electric shock and loss of life.)

⚠ Precautions for Correct Use

Failure to follow the proper instructions may cause damage to property, the product, or malfunction of the product that would void the warranty.

1. Please remove any objects that can interrupt ventilation around the product.
2. Please turn off the power of the product immediately if it fails to operate properly.
3. Carefully wire the product according to each product's specification.
4. Please be careful in preventing chemicals such as thinner, benzene, etc. in contact with the surface of the product.
5. Do not apply excessive force/impact to the product.
6. Failure to follow any of the instructions above may cause malfunction or damage to the product, fire, and electric shock.

Ordering Specifications

SBE130	-	220
[Model number]		[Voltage]

[Model number]
- SBE130
- SBE150

[Voltage]
- 24-DC24V
- 110-AC110V
- 220-AC220V

Product Specifications

■ Explosion Proof Specifications

Model number	SBE130/ SBE150
Range of operating voltage	DC 24V
	AC 110V/ 220V
Ex mark	Ex d II C T6 IP56
Ambient operating temperature	-40°C ≤ Tamb ≤ 60°C
Explosion proof Zone	Zone1, Zone2
Protection rating	IP56

Zone definitions(Gas)	Zone 1	High risk gas/vapour
	Zone 2	Medium risk gas/vapour
Group definitions(Gas)	GROUP II A	Acetone, Petrol, Methanol, Propane, Toluene
	GROUP II B	Ethylene, City gas
	GROUP II C	Hydrogen, Acetylene, Carbon sulphide
Maximum surface temperature of electrical equipment	T1	450°C
	T2	300°C
	T3	200°C
	T4	135°C
	T5	100°C
	T6	85°C
Zone definitions(Dust)	Zone 21	High risk powder/dust
	Zone 22	Medium risk powder/dust
Group definitions(Dust)	GROUP II A	Ignitible fibers/flyings(more than 0.5mm)
	GROUP II B	Non-conductive dusts
	GROUP II C	Conductive dusts

■ General Product Specification

Model number	Frequency	Volume	Bell diameter	Voltage	Current	Certificate	Weight
SBE130	400Hz	95dB	120mm	DC24V	0.044A	-	2.27kg
				AC110V	0.044A		
				AC220V	0.022A		
SBE150	600Hz		150mm	DC24V	0.044A	KIMM	2.52kg
				AC110V	0.044A		
				AC220V	0.022A		

## Dimensions

(Units : mm)

SBE130

SBE150
Terminal Box Wiring Instructions
- Terminal block is located inside of the product. Unscrew the 4 bolts located in the upper body to get rid of the upper lighting element of the unit.
- Please apply fork (U-type) or ring (O-type) locking spade terminal at naked tip of the wire for secure connection.
- Please wire the power line to terminal ①
- For AC type products, wire regardless of polarity.
- For DC type products, wire terminal of black line to (-) polarity.
- External power line - UL1015 AWG18(0.75sq) x 2C 400mm

※ Applicable cable range : AWG16-AWG22

Parts Definition/ Installation

■Parts Definition

Bell(Al)
Cover(Al)
Housing(Al)
①
■Installation

- First, machine taps or holes on the mounting surface ①.
- The mounting hole of this product is 8mm in diameter.
- When machining taps, fasten the bolt through the mounting hole of the product.
- When machining holes, insert the bolt through the hole of the product, and tighten the nut from the opposite side of the mounting surface.

Grounding Instructions
M4 ground contact part

- Please use an M4 bolt at the location marked in the diagram above to ground the product.
- When connecting the grounding cable, please use a ring terminal.
- Please use a grounding cable with a diameter greater than 4mm.

Mounting Hole Specifications

- Machine holes on the mounting surface referring to the diagram below.

4-Ø9 HOLES
108
108

Installation Environment and Protection Rating

- This product is designed for use with protection rating of IP56.
- If the product is installed in locations that subject it to excessive dust or water other than the designated IP protection rating indicated(IP56), it may cause malfunction or damage to the product.
- For further information, please visit our website(www.qlight.com).
