✦ Features of Kezheng Red Eagle Cutting Machine ✦

- ◆ Humanized operation interface, novices can quickly become familiar with the operation and use
- ◆ External voltage digital display, visual display of the current grid input voltage value, external reserved holes, convenient to install other configurations in the future.
- ◆ Shutdown brake function
- ◆ Built-in a variety of graphics, directly recall and modify the size to quickly cut the material.
- ◆ Support international G code, support U disk to import cutting program, support folder management function.
- ◆ One-key cutting, automatic slit compensation, real-time monitoring of arc voltage changes, real-time tracking of cutting height, ensuring cutting quality.
- ◆ Gantry structure, both sides adopt precision gear/rack and planetary reducer for transmission, with large output torque, fast and stable running speed.
- ◆ The use of high-flexible shielded wire, good shielding effect, long use time, using anti-wear nylon drag chain, to protect the cable / air pipe from damage
- ◆ Precision screw lifting mechanism; maximum load 15kg, universal gripper (can hold cutting torch within 50mm in diameter)

Technical parameter

Cutting Method	Flame/Plasma		Single Flame	Single Plasma
Specification	KZ-2206H	KZ-2506HD	KZ-2206H	KZ-25060
Cutting Range	2.2m*6m	2.5m*6	2.2m*6m	2.5m*6m
Height Adjustment	Electric	Automatic	Electric	Automatic
Input Voltage	AC220V±10V ≤ 1KW			
Travel Speed	≤12000mm/min			
Running Accuracy	≤0.3mm			
Cutting Accuracy	≤0.5mm			
Flame Cutting Thickness	≤160mm			
Plasma Cutting Thickness	≤40mm(Size of the plasma power determines)			
Track Length	Standard 6.6m(Length can be increased or decreased, 2.2m/section			
Cutting Material	carbon steel plate、 stainless steel plate、 aluminum plate and other materials
