

Red Panther

MODEL: EED-1

SMALL BUT POWERFUL

The **RED PANTHER** range of dry powder extinguishers is certified to BS EN : 1996 and manufactured under an ISO 9001 approved Quality system.

The cylinders are deep drawn from cold rolled steel, center welded and pressure tested to twice the extinguisher's working pressure.

Cylinder are externally coated with epoxy polyester (with phosphate under treatment) for maximum corrosion resistance and have passed the 480-hour salt spray test. The hot forged brass valve is fitted with a press can be tested ' in-service' as required by BS EN 3:1996.

The **RED PANTHER** range of dry powder FEs is charge with specially fluidized and siliconised mono ammonium phosphate powder which offer resistance to compaction where the extinguisher is installed in a location subjected to vibration and are safe and effective for use on Class A, B, and C fires under BS EN3: 1996 classification of fires.

CERTIFIED BY

Anti Rust
Easy to use
Light & Portable
Easy to maintain
No costly servicing

**PORTABLE
FIRE EXTINGUISHER**

Type: Stored Pressure Type
Capacity: 1kg
Body Diameter(mm): 80mm
Approx.Full Weight: 2Kg
Working Pressure: 12 BAR
Burst Pressure: Exceeds 69 BAR
Fire Class: A,B,C+Electrical

Paint Fishing: Signal Red (RAL3000)
Epoxy Polyester Powder Coating
Design & Manufacture to: BS EN 3-1966
Extinguishant: ABC Dry Powder
Properllant: Dry Nitrogen (N2)
Overall Height(mm): 322mm
Working Temp.Range: -20°C to +60°C

Text Pressure: 25 BAR
Fire Rating: 5A 34B
Coating(Internal): Stoving Epoxy Primer
