

# SMOKE HOOD

MODEL: ML-117

**Net weight:** (without package) 55 gsm ± 3 gsm

**Mask Size:** (unfolded) 380mm W\* 395mm L\* 4mm D

**Packaging:** packed with vacuumed aluminum foil

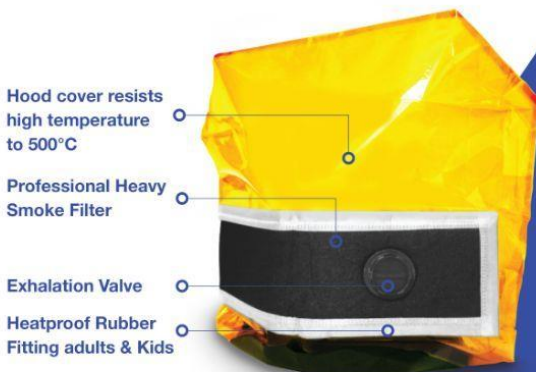

**Color:** hood-transparent orange color, filter - black, Neck Strap - back

**Shelf life:** 4 years packed in the aluminum package.

**The Hood:** The transparent film can resist high temperature up to 500°C, it is designed to fit the face with 360°C full angle of view, able to communicate and hearing when put on the hood.

**The Filter:** The multi-layers filter can stop and reverse the toxic smoke in fire not easy to break though directly, and the toxic smoke to be purified by the elaborative construction filter.

**The Neck Strap:** The neck portion made of fire resist material, it has an excellent elasticity and stretches, Block the smoke from outside. One size fitting adults, children and infant.

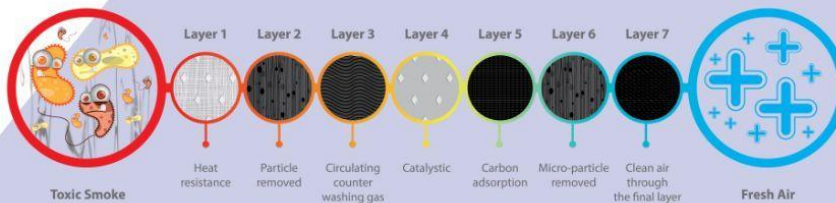

Hood cover resists high temperature to 500°C

### PRODUCT DESCRIPTION

MapleLeaf Smoke Hood is a small, portable, heat resistant with filter efficiency that can protect you against toxic smoke from fire. The full face mask can be easily and quickly put on for you to escape from fire without any delay. Safety is everything, you should prepare a Smoke Hood.

The Smoke Hood has passed the International Authorities tests for the performance of filtering the dense smoke in fire and high temperature resistance.

### THE GOOD DESIGN AWARD

The Award is organized by the Japan Industrial Design Promotion Organization (JIDPO) and ranked as one of the world's top three industrial design award. It is the most recognized certification of quality, practicality and design in Asia.
