Ricoh projectors provide high quality presentations

RICOH PJ WX 2240/PJ X2240/PJ S2240 lightweight and compact projectors combine all the advanced functionality, reliability and value for money you expect from Ricoh. While small, these projectors pack a big punch with 3,000 lumens brightness (3,100 for RICOH PJ WX2240), high contrast levels and long lamp life. Designed to be durable and simple to use, these versatile projectors are easily carried for set up in any convenient location. The remote control makes operation easy and the wide choice of interface connections including HDMI, allows input from a range of devices for maximum flexibility.

- Lightweight, compact and easily carried for convenient location
- Durable with long lamp life up to 6,000 hours in eco mode
- Bright, high contrast resolution for clear presentations
- Simple operation with remote control for convenient use
- Wide selection of interfaces for versatile choice of device input

Easy to operate, feature rich projectors

Outstanding image quality

Image quality is assured with 3,000 lumens brightness for the RICOH PJ X2240 and PJ S2240 (XGA/SVGA) so the projector can be placed from 1 to 12 metres distance from the screen. The WXGA format PJ WX2240 model has 3,100 lumens brilliance. Image brilliance is matched by high contrast of 10,000:1, providing clear, vivid images and deeper blacks that will enhance any presentation-like text and graphs.

Lightweight and easy to use

Weighing only 2.6kg, these compact projectors have a footprint just larger than an A4 sheet of paper, making them highly portable for fast set-up anywhere there is a power outlet. Operation is easy with a remote control to give full management of features and functions. The in-built speaker on the PJ X2240 and PJ WX2240 models means that no external sound system is required for presentations.

Flexible choice of device interfaces

All the models have the latest HDMI interface allowing high quality image projection including 3D content (optional 3D glasses required), futureproofing your investment. The PJ WX2240 and PJ X2240 models have input ports for two computers as well as an output port to a monitor and an audio-out connection for linking to an external sound system, if required. The PJ S2240 can connect one computer and all models have a port for PC Control (RS232).

Designed to be durable for maximum reliability

This highly versatile range of projectors has been designed to be durable, requiring the minimum of maintenance. Lamp life is 4,500 hours in standard mode and using the EcoMode feature lowers lamp brightness, reducing energy consumption and can extend lamp life by over 30% to 6,000 hours. Ricoh is the brand you can trust and the robust design of these projectors ensures low Total Cost of Ownership.
