

BWS™ OUTDOOR FILTRATION SYSTEM

Hollow Fibre Membrane
(Membrane material: PAN)

BWS™ Ultra Filtration System is the latest solution to acquiring the lean and pure water you desire in a world so plagued by pollution today. Compared to the conventional filter cartridge, BWS™ Ultra Filtration System possess the pore size of a mere 0.01 micron. Consequently, 99.99% of impurities and harmful residue in the water is not able to pass through it. In addition, the large membrane area permits huge amount of water to be filtered at a time, thus resulting in a high flow rate that is capable of offering the entire household with ample quality water. With density up to 0.02 micron, the appearance and taste of your daily water for consumption will definitely be more than promising.

Technical Specifications

BWS Model	SS 2000	SS 2500
Diameter x Length (mm)	114 x 770	114 x 1028
Flowrate (lit/hr)	2000	2500
Housing Material	SUS 304 Stainless Steel	SUS 304 Stainless Steel
Connector	3/4"	3/4"
Filter Material	Hollow Fiber	Hollow Fiber
Automatic Flushing	Optional	Optional
Max Working Pressure	4.5 bar	4.5 bar

Preserves Mineral

Density up to 0.01 micron

Bacteria Guard

SUS304 Stainless Steel Casing

Automatic Daily Flushing System
