

Safety data sheet SOR/88-66	according to U.S.	A. Federa	al Hazcom	2012 and Canadian Regulation
SECTION 1. Identif	ication of the subs	tance/mix	ture and o	f the company/undertaking.
1.1. Product identifier.				
Code. Product name. Chemical name and sync	F	HI84533-55 Formol Numb SULPHURIC /	er Calibration ACID 0.42%	Standard
1.2. Relevant identified us	es of the substance or mi	ixture and us	es advised aga	inst.
Intended use.	F	Reagents for	Measuring For	mol Number (Nitrogen) in Wine and Fruit Juice.
1.3. Details of the supplier	of the safety data sheet.			
Name. Full address. District and Country.	s 4 1	• • •	1 Nusfalau	(Salaj)
e-mail address of the cor responsible for the Safet	npetent person.	sds@hannair		
Product distribution by:				Park East, Woonsochet, Rhode Island, USA 02895 - nformation: +1-800-426-6287
1.4. Emergency telephone	number.			
For urgent inquiries refer	ł	hours/365 day		formation: +1-800-424-9300 - CHEMTREC 24 al Emergency Contact Information: +1-703-527-3887 - ys
SECTION 2. Hazard				
		to the provi	sions out forth	in OSUA Hazard Communication Standard (HCC) (20 CED
1910.1200). The product	thus requires a safety data	sheet.		in OSHA Hazard Communication Standard (HCS) (29 CFR are given in sections 11 and 12 of this sheet.
Classification and Hazar	-			C C C C C C C C C C C C C C C C C C C
Skin corrosion, catego Serious eye damage,	ory 1C	Causes severe skin burns and eye damage. Causes serious eye damage.		
Hazard pictograms:				
Signal words:	Danger			
Hazard statements: H314	Causes severe skin burns	and eye dam	age.	
Precautionary statement Prevention:	S:			
P280 Response:	Wear protective gloves, pr	rotective cloth	ing, eye protecti	ion and face protection.
P303+P361+P353 P305+P351+P338				ated clothing. Rinse skin with water / shower. nutes. Remove contact lenses, if present and easy to do.

HI84533-55 - Formol Number Calibration Standard

## SECTION 2. Hazards identification. />>

P310 P391 Storage:	Immediately call a POISON CENTER or doctor. Collect spillage.
Disposal:	

#### 2.2. Other hazards.

Information not available.

## **SECTION 3.** Composition/information on ingredients.

#### 3.1. Substances.

The product does not contain substances classified as being hazardous to human health or the environment pursuant to the provisions Regulation (EU) 1272/2008 (CLP) (and subsequent amendments and supplements) in such quantities as to require the statement.

#### 3.2. Mixtures.

Information not relevant.

## **SECTION 4. First aid measures.**

#### 4.1. Description of first aid measures.

Not specifically necessary. Observance of good industrial hygiene is recommended.

#### 4.2. Most important symptoms and effects, both acute and delayed.

No episodes of damage to health ascribable to the product have been reported.

#### **4.3. Indication of any immediate medical attention and special treatment needed.** Information not available.

## **SECTION 5. Firefighting measures.**

#### 5.1. Extinguishing media.

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

## 5.2. Special hazards arising from the substance or mixture.

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Do not breathe combustion products.

## 5.3. Advice for firefighters.

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations. SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

## **SECTION 6.** Accidental release measures.

## 6.1. Personal precautions, protective equipment and emergency procedures.

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

HI84533-55 - Formol Number Calibration Standard

US

## SECTION 6. Accidental release measures. ..../>>

### 6.2. Environmental precautions.

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

#### 6.3. Methods and material for containment and cleaning up.

Collect the leaked product into a suitable container. If the product is flammable, use explosion-proof equipment. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

### 6.4. Reference to other sections.

Any information on personal protection and disposal is given in sections 8 and 13.

## **SECTION 7. Handling and storage.**

### 7.1. Precautions for safe handling.

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use.

### 7.2. Conditions for safe storage, including any incompatibilities.

Keep the product in clearly labelled containers. Keep containers away from any incompatible materials, see section 10 for details.

## 7.3. Specific end use(s).

Information not available.

## **SECTION 8. Exposure controls/personal protection.**

## 8.1. Control parameters.

Information not available.

#### 8.2. Exposure controls.

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must comply with current regulations. HAND PROTECTION

Protect hands with category III work gloves (OSHA 29 CFR 1910.138).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

EYE PROTECTION

Wear airtight protective goggles (OSHA 29 CFR 1910.133).

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a NIOSH certified filter, whose class must be chosen according to the limit of use concentration (NIOSH 42 CFR 84, OSHA 29 CFR 1910.134). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus or external air-intake breathing apparatus. For a correct choice of respiratory protection device, see standard NIOSH 42 CFR 84 and OSHA 29 CFR 1910.134. ENVIRONMENTAL EXPOSURE CONTROLS.

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

## **SECTION 9.** Physical and chemical properties.

9.1. Information on basic physical and chemical properties.

	alle priferear and enerniear propertieer
Appearance	liquid
Colour	colourless
Odour	odourless

HI84533-55 - Formol Number Calibration Standard

## **SECTION 10. Stability and reactivity.**

### 10.1. Reactivity.

There are no particular risks of reaction with other substances in normal conditions of use.

#### 10.2. Chemical stability.

The product is stable in normal conditions of use and storage.

#### 10.3. Possibility of hazardous reactions.

No hazardous reactions are foreseeable in normal conditions of use and storage.

### 10.4. Conditions to avoid.

None in particular. However the usual precautions used for chemical products should be respected.

## 10.5. Incompatible materials.

Information not available.

## 10.6. Hazardous decomposition products.

Information not available.

## **SECTION 11. Toxicological information.**

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.

It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

## 11.1. Information on toxicological effects.

## ACUTE TOXICITY.

LC50 (Inhalation - vapours) of the mixture: LC50 (Inhalation - mists / powders) of the mixture: LD50 (Oral) of the mixture: LD50 (Dermal) of the mixture: Not classified (no significant component). Not classified (no significant component). Not classified (no significant component). Not classified (no significant component).

This product is not considered to be a carcinogen by IARC, ACGIH, NTP, and OSHA.

US

Revision nr.1 Dated 12/16/2016 Printed on 12/19/2016 Page n. 5 / 9

## SECTION 11. Toxicological information. .../>>

SKIN CORROSION / IRRITATION.
Corrosive for the skin.
Classification according to the experimental Ph value.
SERIOUS EYE DAMAGE / IRRITATION.
Causes serious eye damage.
RESPIRATORY OR SKIN SENSITISATION.
Does not meet the classification criteria for this hazard class.

GERM CELL MUTAGENICITY. Does not meet the classification criteria for this hazard class.

CARCINOGENICITY. Does not meet the classification criteria for this hazard class.

REPRODUCTIVE TOXICITY. Does not meet the classification criteria for this hazard class.

STOT - SINGLE EXPOSURE. Does not meet the classification criteria for this hazard class.

STOT - REPEATED EXPOSURE. Does not meet the classification criteria for this hazard class.

ASPIRATION HAZARD. Does not meet the classification criteria for this hazard class.

## **SECTION 12. Ecological information.**

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

**12.1. Toxicity.** Information not available.

#### 12.2. Persistence and degradability. Information not available.

**12.3. Bioaccumulative potential.** Information not available.

12.4. Mobility in soil.

Information not available.

## 12.5. Results of PBT and vPvB assessment.

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

## 12.6. Other adverse effects.

Information not available.

## **SECTION 13. Disposal considerations.**

## 13.1. Waste treatment methods.

Reuse, when possible. Neat product residues should be considered special non-hazardous waste. Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations. Waste transportation may be subject to dangerous goods transport regulations. CONTAMINATED PACKAGING Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.
