

## AD409 Pro-Es HDMI Digital Microscope with Endoscope

- High-quality metal lens and focusing barrel

Industrial-grade material brings you an unparalleled focusing feel and a durable and solid product experience.

- Microscope with Endoscope all-around view 360°

Equipped with an endoscope for clear observation of the sides of components, the inside of pipes, etc., enabling 360° observation without dead angles.

- Professional HDMI digital microscope supports multiple output methods

Ultra-high definition 2160P Video Record, 10.1 inch IPS screen while supporting HDMI output, allows you to see a more microscopic world and free your eyes all the time. Professional digital microscope Supports multiple output methods : HDMI output, PC output ( endoscope not supported ), and WIFI output.

- Soldering Microscope with Pro Metal Stand

Equipped with Andonstar's newest upgraded Pro bracket (size: 7\*7.8\*13inch), the angle of the bracket is adjustable front and rear, and it can be rotated 360° horizontally. The larger metal base plate and the higher working distance can meet your needs for repairing larger circuit boards. Strong metal material, suitable for high-temperature environments such as soldering.

- Unique UV filter design

The UV filter is equipped in front of the metal lens to block soldering heat, smoke, and dust to protect the lens, which is very suitable for soldering and maintenance professionals.

- 8 Levels Adjustable LED Lights

2 metal base plate side lights, a total of 8 intensity levels of LED lights, the light body can be bent and the angle can be adjusted, which can meet your different requirements for image brightness and lighting angle to get the best image effect.

- Convenient Wireless Remote Control

It is convenient for you to operate from a long distance and supports functions such as image discoloration and digital zoom. It is especially suitable for demonstrations and other scenes. Easily take photos and videos, and avoid the shake that affects the picture quality caused by pressing the screen buttons.

- Professional Measurement Software

Simply download our professional measurement software, you can easily connect the microscope to your Windows PC to measure the length of objects, calculate the area, take photos, videos, etc.

- Easy to use, more than a microscope

Easy to rotate the metal focusing wheel to focus, and rotate the bracket knob to fine-tune the working distance. Quickly access the wonderful micro world! With a Micro SD card, you can easily capture and store images or videos of the microscopic world you observe. (recommended to use class 10 high-speed memory card, up to 64G)

- What you can get

AD409 Microscope host, Metal base plate, UV filter(has been assembled in front of the lens), Remote control, Power plug, Wrench, Metal clips, Beam assembly, Metal Column, Endoscope adjustable arm, Switch cable, USB cable, HDMI cable, Endoscope accessories, Endoscope, Instructions, 24-hour professional after-sales service.
