

Nimatic Auto Refractometer

With this instrument you can easily and quickly check the freezing point in your antifreeze, wind-screen wash and battery fluid.

- Measures propylene, glycol and ethylene
- Can also be used for checking electrolytic batteries
- "Hidden" calibration screw prevents the refractometer from incorrect adjustment while in use
- Double joint on daylight plate ensures that the daylight plate fits exactly on the main prism
- Light sensitivity ensures use in normal lighting
- Easy and quick to use

Nimatic Auto Refractometer is securely packed with manual, pipette and screwdriver for calibration.
