

ATF BOOSTER

Spanjaard ATF Booster replenishes additives in old automatic transmission fluid (ATF), extending useful life and ensuring smooth and optimal functioning.

APPLICATION

- Excellent anti-wear properties provide additional protection for components.
- Aids in reduction of oil thickening.
- Aids in prevention of deposit formation.
- Improves friction performance for a smoother ride.
- Compatible with all automatic transmission fluids.
- Safe on all seals and contains no harmful solvents.

APPLICATION INSTRUCTIONS

Drain 250ml of the old fluid from the transmission.

Add full contents of the ATF Booster tin (250ml) directly to the transmission.

TYPICAL PROPERTIES

Colour	Clear light brown liquid
Density, (25°C), g/ml	0,845
Viscosity (40°C),cSt	19-24
