

ISOCHEM 980 - ALKALINE COIL CLEANER

Isochem 980 is a heavy duty, low foaming alkaline cleaner, decarbonise and degrease effectively. It is light brown coloured alkaline liquid, contains a penetrant which dislodges carbon deposits, greases and oily deposits. It effectively cleans steel, stainless steel and cast iron.

PHYSICAL PROPERTIES

Appearance : Reddish Clear Liquid

Specific Gravity: 1.20 – 1.30

APPLICATION

Isochem 980 can be diluted with water at 1:4 or as required. It can also be used directly without further dilution for the heavy duty cleaning, by dipping substrate into tank.

ADVANTAGES

- Effective action, decarbonise, derust and degrease
- Prevent rusting of metal
- Easy application, brush-on or use Dip tank. Component easily rinsed.

PRECAUTION

The solution is alkaline and the necessary precautions should be practised. Wear gloves to prevent possible splash coming in contact with the skin and also safety goggles for eyes protection.
