TILE CEILING

(LAY-IN / LAY-ON SYSTEM)

Series 06 Lay-In / Lay-On Tiles Series is designed for ease of installation in conventional T-Grid ceiling system with T-bar size of 15mm and 24mm width. The modular design of this series is enhanced by the exposed T-Grid which also makes it ideal for buildings where regular maintenance or services are required for air-conditioning system, ducts, service pipes or computer/ telephone networks.

The Lay-In / Lay-On system also makes it extremely accessible and adaptable to periodic changes in lighting or service layouts when required in building such as offices, supermarkets, exhibition hall and hotels.

Material
SP.ace Metal Lay-In / Lay-On Tiles Ceiling Series
615-TG-NP/P - 0.70mm Aluminium.
624-TG-NP/P - 0.70mm Aluminium.
624-TF-NP/P - 0.70mm Aluminium.

Paint System / Coatings
Powder Coating (Standard) :
minimum 60 microns, thick coating providing excellent surface protection and finish.

(CLIP-IN SYSTEM)

Series 06 Clip-In Tiles Series is a beveled edge modular ceiling system that form visually closed joints. This premium collection is specially crafted for the discerning viewer with the bevel edged tiles emphasizing the crisp ceiling joint lines and clean ceiling design. The metal ceiling tiles are clipped into a concealed Grid system, making the ceiling system both visually appealing and hygienic as it avoids misaligned ceiling tiles which accumulate dust. This system is particularly useful where internal and covered external ceiling consistency is sought after, as in supermarket, commercial centres, showrooms and community halls.

Material
SP.ace Metal Clip-In Tiles Ceiling Series 600 C-0.70mm Aluminium.

Paint System / Coatings
Powder Coating (Standard) :
minimum 60 microns, thick coating providing excellent surface protection and finish.
