

GSM

*Stay alert of your home's status
No Matter Where You Are with GSM Module*

anytime, anywhere...it's all in your hand

Stay alert of your home's status no matter where you are with GSM module. This 24-hours Telephony Monitoring system reports on your home's status through instance SMS messages. Compatible with all mobile networks, you will receive SMS messages on your home security system's arm/disarm status and emergencies such as power failure or system trouble. In case of tampered fixed lines or line disruptions, the system will even be automatically activated as your normal telephone for out-going calls.

Is used in conjunction with a BluGuard Control Panel:

- GSM-200 (9-zones) for BluGuard Smart Bus L900 Series Control Panel
- GSM-260 (16-zones) for BluGuard Smart Bus V16N & T16N Series Control Panel

Additional Features

- Standard Contact ID protocol for Central Monitoring Station
- Built-in Voice response module
- Standard DTMF for remote control
- Standard industrial SIM Card
