## High Quality Water Filter

### FRP & STAINLESS STEEL OUTDOOR WATER FILTER WITH PE INNER SHELL

High performance Stainless Steel & Poly Ethylene Tank with FRP filament reinforce outer shell. 100% corrosion resistant, higher strenght, can last higher pressure & temperture. Ideal filter system for residential & commercial building. Providing effective water filtration to every water tab in the building.

### NEW ULTRA-FILTRATION MEMBRANE FILTER

- Low Maintainance
- User Friendly
- Affordable
- Durable
- Quality Guaranteed

**10** FRP  
TANK  
years  
Warranty

Imported from  
**KOREA**

#### Ultra-Filtration Membrane Separating

technology is a new high tech of water purification. In the application of the purifying tap water, the hollow fibre membrane filters colloid, impurities, rust, bacteria, algae and macromolecule organism, etc. It can remove harmful organic molecules, chlorine and improve the water taste.
