

Power and productivity
for a better world

LOW VOLTAGE PRODUCTS

ABB is a leader in power and automation technologies that enable utility and industry customers to improve their performance while lowering environmental impact. ABB, the leading power and automation technology group, provides solutions for secure, energy-efficient generation, transmission and distribution of electricity and for increasing productivity in industrial, commercial and utility operations. In Malaysia, we draw on the global R&D, knowledge, quality products and experience of the ABB Group and combine them with local customer interface, production and engineering capabilities.

Low Voltage Products & Systems For Every Applications

Commercial & Industrial Buildings

All over the world office buildings, hospitals, hotels, public buildings, shopping centers, sport complexes and city lighting projects are equipped with ABB Low Voltage Products and Systems. From switchboard to light switch we cover the complete range of equipment required for control and protection of electrical installations. Architects, consultants, builders and contractors appreciate the performance/cost ratio provided by our products. They have made ABB a well known reference for high quality and extremely reliable electrical equipment.

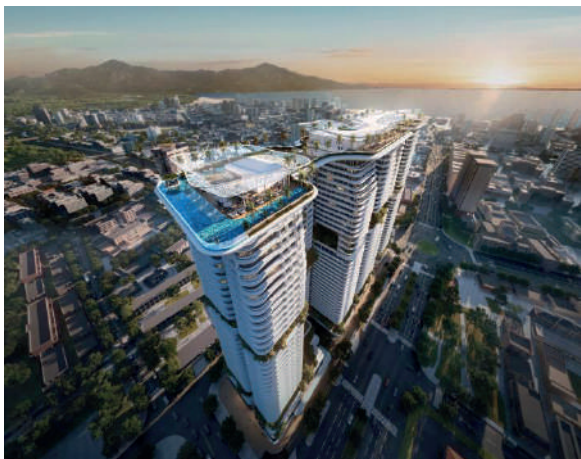

Industry & Process

We have a prominent presence in many fields of industry: steel, oil, pulp and paper, food processing, pharmaceutical and chemical industry, water and waste treatment, transport, electrical power generation and many others. We provide all necessary products and systems enabling distribution of electrical energy, motor starting and control, protection and system control. Our customers value ABB equipment for its dependability, durability and excellent performance/price ratio. They also know that it is fully supported by our world-wide technical advice and assistance network.

OEM, Machine & Equipment

Machine and original equipment manufacturers incorporate our products and systems in the equipment they build, in machines they export, in transport vehicles, etc. We are especially strong in drives, power applications, compressors, power supply, pumps, air conditioning, elevators and escalators. Our products meet both national and international standards, are capable of exceptional performance under all service conditions, supported by full technical back-up. We contribute to making our customers' products perform world-wide.

Domestic & Residential Buildings

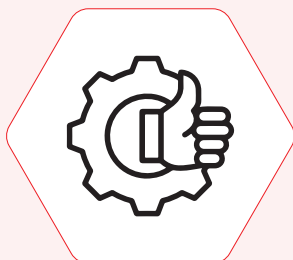

We ensure safety and comfort for everyday life by bringing electric power to domestic appliances, lighting and heating. Through our comprehensive range of enclosures, line protection equipment, wiring accessories and various other components to complete any electrical installation we cover the full spectrum of equipment required for control and protection of all domestic and residential installations. For added convenience we offer intelligent bus monitoring and control of electrical installations.

Key Features & Benefits Of ABB Low Voltage Products

Efficiency

Energy-efficient designs that help reduce operational costs.

Reliability

Highlight ABB's reputation for durable and reliable Low Voltage products.

Safety

Emphasize safety features that protect equipment and personnel.

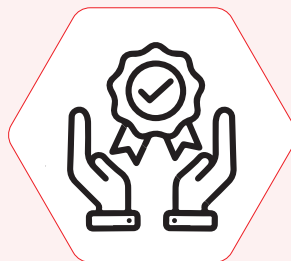

Innovation

Discuss any cutting-edge technologies or innovation in the products.

Compliance

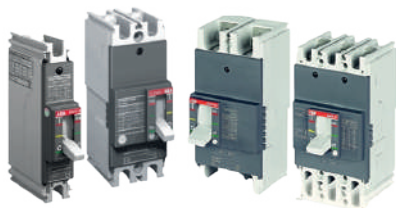

Mention certifications or standards the products meet.

High Quality

Exceed industry standards, ensuring durability and minimal downtime.

Low Voltage Products

**MOULDED CASE CIRCUIT
BREAKERS (MCCB)**

**MODULAR DIN-RAIL
COMPONENT PRODUCTS (MCB)**

AIR CIRCUIT BREAKERS (ACB)

SWITCHES

CONTACTORS

Why Choose Us

In-Depth **Product Knowledge**

In-Depth Product Expertise: We're ABB LV products specialists, offering expert guidance.

Application **Expertise**

Tailored solutions for ABB LV products, maximizing efficiency across industries.

Customized **Solutions**

Aligning ABB LV solutions with your unique needs and goals.

Reliable **Product Sourcing**

Direct access to genuine ABB LV products with warranties.

Technical **Support**

Expert assistance from product selection to troubleshooting.

Strong **Industry Relationship**

Our reputation for reliability and expertise has made us a trusted partner in the industry.

Continuous **Training**

Our team stays updated with the latest ABB LV technology.

Customer-Centric **Approach**

We prioritize your needs, building trust and mutual success.

Contact Us

Join hands with REXIS SDN BHD to embark on a journey of innovation, efficiency, and sustainability. Let's work together to transform your performance and minimize your environmental footprint. Contact REXIS Group to explore how our power and automation technologies can revolutionize your industry, enhance productivity, and contribute to a sustainable future. Together, we can shape a brighter tomorrow.
