Length (mm)		Min.235				
Thickness	Finger tip (mm)	0.05 ± 0.02				
	Palm (mm)	0.07 ± 0.02				
Tensile Strength (before & after using)		Min.9.0MPA				
Elongation (before & after accelerated)		Min.300%				
Packing		100pcs/box . 10boxes/Carton				
		50pcs/box . 20boxes/Carton				

LATEX EXAMINATION GLOVES / LATEX SURGICAL GLOVES

PRODUCT INTRODUCTION

Latex gloves have been the traditional choice for the healthcare industry for over 100 years. Although concerns regarding latex allergies continue, latex gloves are unsurpassed when it comes to durability, tactile sensitivity, comfort and fit.

- Excellent alcohol resistance
- Excellent elasticity and gripping properties
- Pre-powdered and powder free available
- Smooth and textured surface available
- SIZE : XS/S/M/L/XL 6.0/6.5/7.0/7.5/8.0/8.5

Color Choice:

NITRILE GLOVES

PRODUCT INTRODUCTION

Disposable nitrile gloves are the exam glove of choice for nurses and doctors when working in harsh environments. Made from nitrile material, these exam gloves are known for providing protection to various chemicals like chemotherapy drugs. In addition, nitrile has been provides excellent barrier protection providing three times more puncture resistance than latex. It is no surprise that nitrile exam gloves are becoming the preferred latex-free choice.

- Latex free
- Ambidextrous -fits either hand
- Pre-powdered and powder free available
- Textured palm or fingers tips
- SIZE : XS / S / M / L / XL

FABRIC TECHNOLOGY

SPUNBONDED POLYPROPYLENE

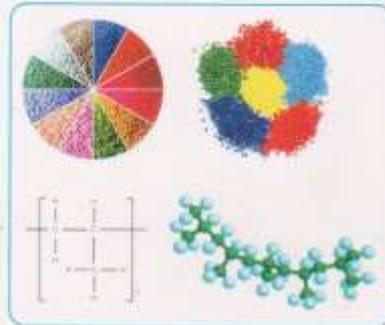

SPUNBONDED POLYPROPYLENE is a lightweight, breathable fabric, which consists of continuous filament, with good tensile strength and elongation.

Features

- Standard fabric for non-toxic workplace, grimy-work environment applications.
- Low-cost solution for protecting workers in dirty environments.
- Different colors are available.

Applications

In most industry, hygiene and medical fields for basic protection, such as lab coats, coveralls, shoe covers, face mask, isolation gowns, surgical gowns, Surgical caps, patient bed sheets, etc.

SPUNBONDED MELTBLOWN SPUNBONDED (SMS)

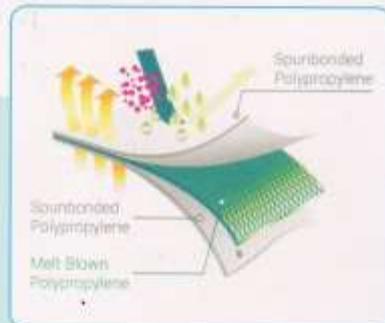

SMS is a tri-laminated and comprised of layers of spunbond polypropylene, meltblown polypropylene, and spunbond polypropylene. Spunbond layer is with good tensile strength and elongation, Melt blown layer is consist of continuous micro fiber.

Features

- Fluid and particulate barrier.
- Strong and durable, yet offer outstanding comfort, breathability, softness, and wearability.
- Lightweight and resistant to tears and punctures.

Applications

Widely apply to high class protection area of medical, industrial, laboratory, electrical, pharmaceutical, such as: isolation gowns, patient gowns, lab coats, coveralls, procedure gowns, caps and facemasks, boot covers, aprons, napkins and diapers.

POLYPROPYLENE COATED POLYPROPYLENE

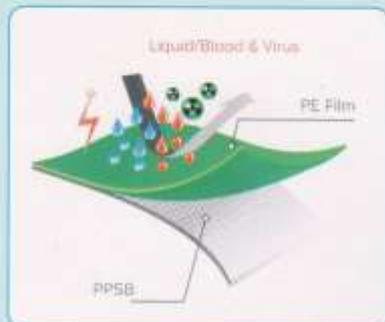

Spunbond polypropylene is coated with a layer of impervious polyethylene.

Features

- Coated with PE film, has provided great waterproof performance and impervious character.

Applications

Widely used for high level of fluid resistant area, to protect from liquid chemicals or biological hazards. For example: Isolation gown, surgical gowns, bed sheet, sleeve cover, etc.

Your
practical solution for
hygiene and safety wear needs
