01

We offer the best inverter products to the industry to ensure customer's return is maximized.

## The Company

Inverpower was established in 2012, primarily involved in the supply of grid-tie solar inverters series of solar components, we also provide consultancy in the design and selection of suitable inverters for residential and commercial PV plants. We offer one of the broadest portfolio of string inverters, including SolarEdge, Sungrow and Hoylimes for microinverters. Our team has commissioned more than 10,000 inverters of various capacities in operation to residential, commercial plants and solar farms.

To complement our inverter offering, we are also the authorised distributor of Staubli (Multi-Contact) PV cable & connector, GAVE Surge Protection Device, RainWise's PVmet™ Meteorological Stations, and Seaward PV Testers.

## Our Vision

To be the preferred Inverter supplier to the solar industry and offer the best after sales support to our customers in Malaysia and South East Asia.

## Our Mission

To continuously provide our customers with the best solar inverter products and support to optimize their return on investments.

# Product Category

- PV Inverters
- Power Optimizer

- String Inverters
- Energy Storage System

- MC4 Connector
- MC4- Evo2
- Branch Socket

- PV150
- PV 200
- Solar Utility Pro

- Miniature Circuit Breaker
- DC Fuse
- Surge Arrester

- Microgrid
- String Inverter

- Micro Inverters

- Solar Weather Station

# What are the benefits?

## Pre-sales design

Our engineers will carry out a site survey and communicate with client about electrical & mechanical information on the installation of the systems.

## Warranty service

All of our products are covered by manufacturer warranty. We help ensure you get the warranty coverage you're entitled within the guaranteed period.

## Trouble-shooting

Our extensively experienced technicians are one call away for inverter repair & maintenance to ensure minimal disruption to owners' business operations.

# Why us?

Inverpower has a team of well-trained engineers and a service centre up and running for a decade. Our team are at your service to ensure that all faulty inverters are taken care of at any point after the purchase.

Inverters being the artery of solar-generated energy. Electricity generated by solar panels are not able to be used without inverters being in a good condition. Inverpower is beyond a distributor that sells inverter, we encompass the expertise and collective experience in repairing and maintaining inverters.

1MWp BiPV System

## Notable projects by InverPower

10MWp Solar Farm

1MWp Solar Plant

# CEO MESSAGE

Most countries aim to reach net zero by 2050, including Malaysia. The Ministry of Energy and Natural Resources of Malaysia (KeTSA) has set a target to reach 31% of RE share in the national installed capacity mix by 2025. Solar is the most promising alternate source of energy because it carries almost zero environmental impact from installation to the end of its lifetime.

As electricity bills continue to rise, higher return on investment (ROI) could be achieved from solar installation. Today, solar energy can generate 30-50% monthly savings for businesses and households on electricity bills. It is a gratifying industry to be part of, knowing what we do will not only benefit our customers, but the habitats of our future generations too.

Inverpower has pioneered the inverter industry by taking extra steps beyond sales, we strive to fulfill customers' demand before, during and after sales. Our team is fully committed to journey together with our customers to make our country, our planet greener.
