

Features

- Suitable for 4 wire system: 2 for audio, 2 for 24VDC overriding
- Built in overriding relay for emergency bypass with LED indicator

Description

PP-5100 is used to isolate a group of speaker (meeting room, etc) from central PA system to allow a separate PA amplifier to utilise those local speakers, but can be overridden by main system when a 24V overriding signal is present

Technical Specifications

Power rating	50W 100V line
Overriding voltage	24V DC: 15mA
Patch connection	1/4" phone jack-front patch
Cabling	4 wire system (2 audio ; 2 overriding)
Size (front panel)	86 x 86 mm
Weight (excl. enclosure)	69 gms
Concealed (WxHxD)	77 x 77 x 60 mm
Surface (W x H x D)	85 x 85 x 60 mm
