

Precision Cutting Machine

Model: JG-145

(For reference only)

Application and Features

JG-145 Low Speed Precision Cutting Machine adopts advanced controller with compact structure, reliability and anti-interference ability. The machine applies to all kinds of materials, especially suitable for artificial crystals with high values. The equipment is equipped with four fixtures, such as A, B, C, D device, which can cut the work piece at the best angle. There is a limit switch on the machine and meanwhile the equipments will realize the cutting operation without anybody. The shaft has high precision when running and accurately adjust the level of objects. After cutting, the machine will stop automatically.

Technical Specifications

Model	JG-145
Cutting wheel size	External diameter 100mm ~ 150mm Internal diameter 20mm
Chuck external diameter	48mm
Travel	25mm
Shaft speed	0 ~ 600rpm continuously
Dimension	390 x 430 x 400mm
Weight	22 kg
Motor	65W / AC220V / 110V
Input power	80W
Water tank	0.4L
