

Concora Medium Fluter

Brand: JNG

Model: JG-319A

(Photo for reference only)

Product Description

It is used to make samples for CCT/CMT for testing flat crush strength and vertical crush strength of corrugating medium.

Standard

GB/T 1061-2016; ISO 7263-1-2018

Main Features - Hardware

1. The appearance of the machine adopts the paint spraying process, with high anti-rust ability and beautiful appearance.
2. Finishing S136 grooved wheel, good thermal conductivity, high precision and wear resistance.
3. The instrument has fast response speed and small rotation error.
4. The fluted wheel and the top cover are equipped with anti-scalding and heat-insulating devices to prevent the operator from accidentally touching the scald.

Technical Parameters

Item	Description
Speed	4.5r/min
Temperature Resolution	1°C
Temperature Range	Room temperature-200°C
Upper tooth Radius	(1.5±0.1)mm
Lower Tooth Radius	(2.0±0.1)mm
Tooth Depth	(4.75±0.05)mm
Outer Diameter of Fluted Wheel	(228.5±0.5)mm
Thickness of the Fluted Wheel	16±0.05mm
Specimen Size	152mm×12.7mm (L*W)
Work Pressure	(49-108)N
