

brings pre-vac valve maintenance down to earth

Features

- revolutionary and economically easy to install
- bayonet-type quick release pre-vac valve
- unique design – releases built-up pressure and prevents low level discharge
- works in extreme temperatures -40°f (-40°C) to +140°f (+60°C)
- lightweight components, one man operation
- no seals are broken, no retest required
- safe working environment conforming to health and safety regulations

Easy to retro fit to existing vent systems no cherry pickers, scaffolding or step ladders – swivels your vent riser to working height for easy access to change valves

In line with working at height regulations, atlas easy riser demonstrates our continuing commitment to product development
