Avoid direct sunlight

Content: 4000ml

ECOShield™ PRO

Organic Pest Control Spray

How to apply ECOShield PRO ?

Apply ECOShield PRO by spraying directly on the insect pest. It will dehydrate insect pest slowly upon contact.

Where to apply ECOShield PRO ?

Spray directly on insect pest. Upon contacted with ECOShield PRO, the solution mechanically removes waxy layer of insect pest body. This drives internal fluid of insect pest to evaporate and knockout in a few minutes. As such there is no known species resistance to ECOShield PRO. This solution is safe to use around pets and children. **For insect pest preventive strategies**, spray ECOShield PRO directly on the wall skirting area, crack & crevices in the wall frequently occupy by insect pest. Wipe off excessive ECOShield PRO liquid with a paper towel or cloth. **For Dengue prevention**, spray ECOShield PRO directly on stagnant and shallow water area such as flower pot plates to destroy mosquito eggs once a week. Spray directly on Mosquito and wall skirting below indoor window to repel mosquito from flying into your house. Allow ECOShield PRO active ingredients that you apply on the area to work for you. It will repel current and future insect pest from residing there. To apply on fabrics or other non-porous surfaces, allow product to remain on the surface. For hard floors, caution is needed due to slickness. Does not discolor plastics, however, test on a small area of colored materials to ensure product does not cause discoloration.

How often do I apply ECOShield PRO ?

Reapply biweekly for most applications. Reapply each week where product is used outdoors or where excessive cleaning or weathering may occur.

Ingredients

Proprietary blend of plant based essential oil, Plant-based Octadecenoic Acid Potassium Salt, Lecithin, Purified Water.

Caution: Supervise use by children

Precautionary Statements: Maybe irritating to eyes. Avoid contact with eyes. If in eyes, wash thoroughly with water. If irritation persist, get medical attention. May discolor some objects so test prior to use on painted or stained objects. Avoid spraying directly on pet, human and vegetation.
