Medium High Voltage

Overhead lines and cabins

Code: **PVR3/600D-SD**

High insulating rod with dynamometric release for short circuiting and grounding equipment

High insulating rod in 3 elements with dynamometric release for short circuiting and grounding equipment with limit of strength to apply to the conductors to clamp. Made of vinylester resin tube reinforced by fiberglass and filled by closed cells polyurethane foam, tube type PVR, orange colour, certified in compliance with the International Standard IEC 60855-1, for internal and external use. External diameter: \varnothing 40 mm.

Total length: 6 m

Complete of:

- Attack with dynamometric release with clamping force $14 \text{ Nm} \pm 20\%$ (or other on demand) suitable for the maneuvering of the contact clamps;
- Insulating closing cap;
- Hand guard;
- Protection for under rain use on demand;
- Quick couplers for jointing the three elements;
- DIN bayonet attack.

Code	Elements	Total length
PVR1/200D-SD	1	2 m
