Company Profile

ABOUT ACXUS

In the year 2001, Acxus Group was established in Malaysia with its **JETA Brand**, as a local provider of printing materials. The Product **QUALITY** and **SERVICE COMMITMENT** have been a standard engagement that we offer to our customers ever since. With the motto of “**Source For Total Quality**”, we provide utmost dedication to serve our valuable clients which gave us the edge in the printing industry during the company's formative years. Then, after years of unremitting efforts from consumables supplier, we managed to diversify into a large-format printing solutions company that continues to provide best quality materials using the latest printing technology.

In the year 2017, Acxus Group was awarded distributorship of **MIMAKI & IECHO** printer and digital cutting plotter giving us access to full range of printers and post finishing equipments to enable us to produce high quality images and products for the advertising industry. Each machine is designed to work 24/7 effectively and the flexibility, precision, durability and speed for finishing solution of our machines are what give value for your purchase, giving you the satisfaction of a job well done.

Acxus Group is committed in providing the best products and services for your business, with the utmost care and quality that you truly deserve because your satisfaction is our highest priority. Thus, the job is not complete until we know that our customers are satisfied with the end-results. Our ultimate goal is to make it easier for you to run your business with a peace of mind.

Our Vision

It is our vision to be the leading company that excels in the industry by providing complete and secure total printing solution. We will continue to distribute world class products as we render our Sales and Service commitment to the business partners and future clients.

Our Mission

It is our mission to consistently perform our primary task as a responsible distributor to deliver extraordinary products that represent a superior blend of quality, performance and value to our valuable customers. We continuously strive to engage in dynamic solutions with technical skills and experiences labored with a refined commitment to support our valuable customers as well as offering outstanding customer care through unparalleled service excellence.

Acquires massive high technology development experience that allows them to deliver the best performance.

Japan Technology

Reliable performance & print quality,
User-friendly & Green Technology that
will your experience.

Comprehensive Products

Wide range of Products available for
choosing.

THE ADVANCEMENT OF TECHNOLOGY

MAPS4 (Mimaki Advanced Pass System)

Reduce banding unwanted visible banding on swath boundaries by overprinting between swaths with a reduced number of ink droplets which gives precision results.

NRS (Nozzle Recovery System)

Maintain the productivity & **NCU (Nozzle Check Unit)** to prevent print failure.

NCU (Nozzle Check Unit)

Detects and clean clogged nozzles automatically. If clogging is not resolved after cleaning, the **NRS** selects substitute nozzles to continue the printing operation. These functions allow the printer to maintain productivity until a technician arrives.

Ecology

Newly developed, high performance ink (GreenGuard Certification)

Dynamic & Intelligent Production

The Newly developed software RIP with user friendly and high functionality.
