Cisco Small Business

MGBBX1 1000 Base-BX Mini-GBIC SFP Transceiver

MFEFX1 100 Base-FX Mini-GBIC SFP Transceiver

MGBLX1 1000 Base-LX Mini-GBIC SFP Transceiver

MFEFX1 100BASE-FX Mini-GBIC SFP Transceiver

MFELX1 100BASE-LX Mini-GBIC SFP Transceiver

MGBSX1 Gigabit SX Mini-GBIC SFP Transceiver

MGBLH1 Gigabit LH Mini-GBIC SFP Transceiver

MGBT1 Gigabit 1000 Base-T Mini-GBIC SFP Transceiver

Package Contents

- Mini-GBIC SFP Transceiver
- Documentation pointer card

日本語のクイック スタート ガイドは次の Web サイトから入手できます。

1

Connecting the Transceiver

WARNING

Optical SFPs use a small laser to generate the fiber-optic signal. Because invisible laser radiation may be emitted from the aperture of the port when no fiber cable is connected, avoid exposure to laser radiation and do not stare into open apertures. Keep the optical transmit and receive ports covered whenever a cable is not connected to the port.

Connecting the Cisco MGBBX1, MFEBX1, MGBLX1, MFEFX1, MFELX1, MGBSX1, and MGBLH1

STEP 1 Insert the mini-GBIC SFP module with the printed side up and the rubber port cap facing out.

235242

STEP 2 Remove the mini-GBIC SFP module's rubber port cap.

238244

STEP 3 Connect the fiber cable's LC connector to the mini-GBIC SFP module's port.

238246

STEP 4 Connect the other end of the cable to an SFP module to verify that the fiber connection is complete.

For the Cisco MGBBX1, use the Cisco GLC-BX-D as the downstream SFP. For the Cisco MFEFBX1, use the Cisco GLC-FE-100BX-D as the downstream SFP. The Cisco MGBBX1 and the Cisco MFEFBX1 support upstream only.

Connecting the Cisco MGBT1

STEP 1 Insert the gigabit SFP module with the printed side up and the pull tab facing out.

STEP 2 Lock the gigabit SFP module in place.

STEP 3 Connect the cable to the gigabit SFP Module's port.

STEP 4 Connect the other end of the cable to the switch.

2

Removing the Transceiver

Removing the Cisco MGBBX1, MFEBX1, MGBLX1, MFEFX1, MFELX1, MGBSX1, and MGBLH1

WARNING

Optical SFPs use a small laser to generate the fiber-optic signal. Because invisible laser radiation may be emitted from the aperture of the port when no fiber cable is connected, avoid exposure to laser radiation and do not stare into open apertures. Keep the optical transmit and receive ports covered whenever a cable is not connected to the port.

STEP 1 Press the fiber cable's connector and pull to remove the fiber cable from the mini-GBIC SFP module.

239247

STEP 2 Pull the module's bail latch down.

239248

STEP 3 Remove the mini-GBIC SFP module.

235249

Removing the Cisco MGBT1

STEP 1 Press the RJ-45 connector's tab and pull to remove the cable from the gigabit SFP module.

STEP 2 To remove the gigabit SFP module, begin by pulling the module's pull tab.

STEP 3 Remove the Gigabit SFP Module.

3

Switch Compatibility List

* Requires manual configuration for the 100M SFP. See the following section.

Manually Configuring the 100M SFP

-
- STEP 1** On the Port Configuration page, click **Detail**.
- STEP 2** In the **Port Configuration** popup window, select **eth 100M** in the SFP Speed field.
- STEP 3** Save your changes.
- STEP 4** Insert the 100M SFP module.
-
