

Carbon and Stainless Steels MIG Wire

PRODUCT M&R	DESCRIPTIONS	TECHNICAL DETAILS	Ømm	APPLICATIONS
308L-M	<p>Austenitic stainless steel with modified higher silicon level to increase weld puddle fluidity, ensuring better tie-ins and potentially higher speed.</p> <p>Typical applications include welding AISI 308L in chemical, oil and gas refineries, stainless steel sheet metal works and rail car fabrication industry.</p>	<p>Rm (MPa): 590 A5 (%): 42</p> <p>Weld Metal Analyse: C, Mn, Si, P, S, Cr, Ni</p>	0.8 1.0
