

TRANSFORMER ARC WELDING MACHINE / COPPER COIL

AC-315

The **AC-315** is mostly widely be used in welding field, AC arc welding machine. Widely be used in welding low carbon steel, low alloy steel. 35% rated duty cycle, overloading protection. Transformer is rolled around, with H level material, high welding efficiency, long using lifetime.

Specifications

Input Voltage	415V 2ph 50HZ
NO-load Voltage	70A
Rated Output Current	315A
Output Current Range	70-315A
Duty Cycle	35% 315A / 100%185A
Rated Input Capacity	21KVA
Cooling mode	Air-cooling
Weight	72KG
Insulation	H
Protection Class	IP21S

1.6~5.0mm
