

## Professional pruning chain saws

**Professional chainsaw characterized by an excellent combination of power, lightweight construction and easy handling: elements making this the perfect tool for professional pruning and maintenance services on olive and fruit trees, and other plants.**

- ▶ Compact balanced geometry and minimal weight make the job of the operator much easier, reducing the physical effort required and extending times between rest breaks.
- ▶ Tool-free filter access: just unscrew a knob (attached permanently to the cover to avoid being lost).
- ▶ Innovative shock-absorbing handles: prevents the carburettor being exposed to vibration and guarantees a particularly stable fuel burn, allowing easy operation at any angle.
- ▶ The new chain guard assembly design minimises clogging due to shavings, thus reducing the frequency of cleaning.
- ▶ Metal oil pump with adjustable flow allows variation of lubricant flow to suit operating conditions (consistency of wood, weather, oil type).
- ▶ A taper tipped bar is available for precision applications by qualified tree surgeons.
- ▶ “Easy-on” starting system ensures a smooth pick-up of the engine with no kickback and a limited number of pulls.
- ▶ Lateral chain tensioner, allowing the operator to adjust the chain tension swiftly, even in tricky positions.
- ▶ This chainsaw must be used only for tree surgery by certificated tree surgeons.

### MT 2600

Power/Displacement	1.2 HP - 0.9 kW/25.4 cm <sup>3</sup>
Bar length	25 cm/10"
Chain (pitch x gauge)	3/8" x .050" (sprocket) 1/4" x .050" (carving)
Oil pump	automatic/adjustable
Oil/fuel tank capacity	0.16 L/0.23 L
Weight	2.8 Kg

**Compact and easy-to-handle, designed for professional pruning and cutting of medium-sized branches on the ground and at heights.**

- ▶ A special hook allows the chainsaw to hang from the body of the operator and thus cut branches in those hard-to-reach places that are usually out of bounds to mechanical machinery.
- ▶ The environmentally-friendly, low-emission engine is protected by a two-stage sponge/nylon air filter; its exceptional power generates high chain speed ensuring a clean, precise cut that prevents damaging the bark.
- ▶ Equipped with primer for easy starting from cold.
- ▶ The filter cover can be opened without tools, thus simplifying maintenance.
- ▶ This chainsaw must be used only for tree surgery by certificated tree surgeons.

### 132 S

Power/Displacement	1.6 HP - 1.2 kW/30.1 cm <sup>3</sup>
Bar length	30-35 cm/12"-14"
Chain (pitch x gauge)	3/8" x .050"
Oil pump	automatic
Oil/fuel tank capacity	0.13 L/0.23 L
Weight	3.4 Kg
