

'EAGLE EYES BALLOON' (SCARE-CROW BALLOON) 防鳥球

★ Use any stick or pole to hang the balloons in any part of the paddy fields, wheat fields, grapevine yard, vegetable farms, flower nurseries, etc. The balloon is to be hung with a distance of approximately 30cm (1 foot) between the top of the plants and the end of the decorative strips. For better results, 5 balloons should be hung in every 300 sq metre of the field.

★ For poultry farms (hen house, egg farm, chicken farm, pig farm, etc), balloons should be hung with a distance of 50 feet at every side of the pen/house to be effective.

★ Do the same for fruit plantations. To enjoy better results, hang a balloon on every fruit tree.

★ Eagle Eyes Balloons may be used for a maximum of 3 weeks in one location, after which they are to be relocated to be more effective. This is because each balloon is brightly coloured with a unique design, likened to a luminous piercing eyed bird with its mouth wide opened, ready to prey on its food.

★ The silver round stickers in the package are to be pasted onto the middle of the dark circle of the balloon to look like an eagle's eyes. The 3 decorative strips are to be tied to the bottom of the balloon. The thin string is to be tied to the top of the balloon for hanging.

★ Do Not use high pressure pump when filling air into the balloon. Ensure that only 90% of the balloon is filled with air if placed under the sun. This is to avoid bursting as heat will cause the balloon to expand.

★ Balloons should not be hung inside the pen/house/building. It must be hung outside in the open field or at the side the of building where wind is blowing to be effective.

Solar Insects-Controller 太陽能滅蟲器 高效率!超省錢!更環保!

High efficiency! Save money! Environmental protection!

Broad spectrum for application:

Can be used in various crops including rice, vegetables, fruits, tea, cotton...etc and also with broad spectrum attractive ability of insects by using different lights of different wavelengths.

Features:

1. Runs by solar energy, save electric power and safe use.
2. Wide area can be covered with long durability. Good effect and high efficiency.
3. Environmental protection.

適用範圍：菜園、果園、茶園、瓜園、稻田、花卉等。

特點：利用太陽能發電，節省能源，使用安全。

使用範圍廣，滅蟲效果好，滅殺效率高。

超環保，無公害，保護生態環境。

The Largest Fans Manufacturer in Taiwan
