

## Frequently asked questions with answers about dental implants.

### is it possible to be allergic to dental implants?

Dental implants have been available for more than 40 years. Over this long period no allergies to titanium implants have become known. Titanium has no allergenic components and is completely neutral in the body. Of the materials used for crowns and bridges ceramic has proven the most compatibility to the body. The allergy risks vary for metals and plastics. Let your dentist advise you what material is best for you.

### How do I care for my implantborne teeth?

Implant-borne teeth not only look like natural teeth. They can be cleaned just as easily with a toothbrush — including an electric toothbrush — and tooth paste. When cleaning implants the spaces between the teeth and the transitions to the gums are particularly important. These areas are colonized by bacteria that attack the gum and over time they can also attack the jawbone around the implant. This can be prevented with dental floss or small interdental brushes.

### If I am a diabetic can I still have an implant?

Yes. However, your diabetes must be well controlled. Diabetes that is poorly controlled or untreated may adversely affect the healing processes for metabolic reasons. If there is any doubt the dentist will consult your doctor.

### Can I bite and eat normally with an implant-borne denture?

Regardless of whether you have an implant-borne crown, bridge or denture: you will be able to eat, bite, talk and laugh just you could formerly with your second set of teeth. The denture will be firmly attached to your implants and you can feel quite secure with it.

### Will I be in pain after the procedure?

The gum will probably be sensitive in the first few days after the procedure but will not bleed any more. Your cheek may swell for a short time and may feel uncomfortable. However, most patients will not even need a painkiller on the following day and can return to normal life.

## 10 advantages of DENTSPLY Friadent quality implants

- ✓ Made in Germany
- ✓ Biocompatible pure titanium
- ✓ Multiple tests of product quality
- ✓ Clinically tested
- ✓ Versatile
- ✓ Secure positioning
- ✓ Fast integration
- ✓ Customizable
- ✓ Long-term availability of replacements
- ✓ Available all over the world and internationally approved

**Implants:** the best solution in - every way. Ask your dentist about the options. **Do it now!**

**Naturally invisible — implants in single tooth gaps!**

**As if nothing had ever happened — implants for larger tooth gaps**

**Life with bite! Dental implants for the edentulous jaw.**

Matthew, 21 years old, after a baseball hit him in the mouth.

One single tooth is missing.

The conventional solution: a bridge supported by teeth. This means that the healthy neighbouring teeth must be ground to support the bridge.

An implant-borne crown is the best solution.

**Matthew is smiling again with his implant-borne tooth.**

Ian, 47 years old, has several teeth missing at the end of the row.

Several adjacent teeth are missing.

The removable solution: a simple clip-fastened partial denture.

Single tooth implants are the most elegant solution.

Alternative: the implant-borne bridge.

**Ian with single tooth implants: as if nothing had ever happened.**

Heather, 75 years old, is not happy with her full denture.

The mucosa-supported prosthesis has no retention. The gum has continuous inflammation.

Complete denture fixed to tapered crowns.

Permanently secure: bridge fixed to implants.

**Heather is enjoying life again with her implant-borne third set of teeth.**

# 关于植牙常见的问题与答案。

## 植牙是否会引起人体过敏？

植牙技术的运用已有超过40年之久。对于植牙时所使用的金属钛（Titanium）人工牙根，至今还未发生过使用者过敏的案件。因为在钛里并没有任何会引起过敏的元素，而且对于人体也没有任何负面的影响。经过验证，钛是一种可以用作于牙冠和牙，并与人体骨质相容性高的原料。由于人体中出对金属和塑料的敏感有别，因此在植牙前应先咨询牙医，个人适合哪一种原料。

## 植牙术后应如何照顾？

清理植牙就像清理自然齿一样简单。使用普通牙刷或电动牙刷，加上一般牙膏就能达到清理作用。植牙内外侧与牙龈之间的缝隙清理是很重要的，因为在这些缝隙里很容易藏细菌。若长时间未被清理，将危害牙龈与植牙的周边范围。建议使用牙线或刷头短小且刷毛柔软的牙刷，来清洁牙龈内外侧。

## 糖尿病患者能做植牙吗？

能。患者的糖尿病状况必须控制在适合植牙的水平。若糖尿病未能适当地被控制，将会影响植牙的康复速度与疗程。若有任何疑问，可请求牙医向患者医生询问。

## 植牙后，我能一如既往地咀嚼食物吗？

能。无论是套在植牙上的牙冠，牙桥或者假牙，您都能如常地咀嚼，吞咽，大笑与谈话。它们将会和您的植牙紧密地靠着，也让你感觉到舒适和有安全感。

## 植牙后会感觉疼痛吗？

植牙后的几天虽已经不会流血，但牙龈还是会比较敏感。此外，在短时间内，脸颊会有少许肿胀或不适。然而，在正常情况下，多数的病患都不需要使用止痛剂，并很快就能恢复正常。

# Dentsply Friadent 植牙的10大好处！

- ✔ 德国制造
- ✔ 与人体骨质相容性高的纯钛合金
- ✔ 多方面地品质验证
- ✔ 临床试验证明
- ✔ 能灵巧地应对各种情况
- ✔ 稳固定位
- ✔ 快速整合
- ✔ 能为个人度身定做出最合适方案
- ✔ 耐用及能更换
- ✔ 国际认可

# 植牙改变 您的一生

独家分销商

如自然齿般，不宜被发觉——前牙植牙。

马修先生，二十一岁，在进行棒球运动时被打掉一颗门牙。

失去了一颗牙齿

传统方案：固定式假牙或牙桥方式。利用磨邻接牙的方法来固定假牙或牙桥，左右两旁的健康牙齿也需要被磨平，以作支撑假牙的用途。

最佳解决方案：前牙植牙。

植牙后，马修先生可再次展现灿烂的笑容。

有如什么都没发生过——个别植牙或牙桥植牙。

岚先生，四十七岁，失去牙齿后排的几颗相邻牙齿。

失去了三颗牙齿

可拆除的方案：利用夹子来固定假牙的位置。

最优替代方案：个别植牙或牙桥植牙。

岚先生在个别植牙后，感觉有如焕然一新般地自然。

有“咬劲”的人生！——全额植牙。

丽娜小姐，七十五岁，对于目前的活动假牙深感不满。

假牙的黏膜会伤害牙龈，长久下来，也会引起发炎。

永久又安全的方案：将固定式假牙植入植牙上。

经过全口植牙后，丽娜小姐又可再次体验充满“嚼劲”的人生。
