

PREMERA AE T7 LF

Features and Benefits

- Slow evaporation adhesion promoter.
- Provides Covalent bonding at a molecular level and becomes one with the surface it is applied to.
- Penetrates the surface of the substrate.
- Virtually invisible
- Repels moisture, stains and mold from within the substrate.
- Lower flammability

Applications

- Serves as adhesion layer between coating and substrate, or between two coatings
- Can be applied on Painted or unpainted iron; aluminum, copper and other metals; hot rolled steel, cold rolled steel, stainless steel; powder coated and galvanized surfaces; wood, rubber, plastic, fiberglass and glass.

Application Instructions:

Can be applied by spray, roller, or brush.
Review the TDS for more information.
