

MY3D MY220

3D Printing

Proudly Made In
Malaysia

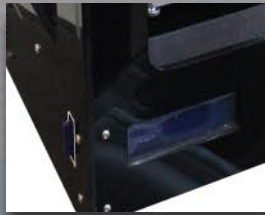

Accurate

High Precision with smart cooling
Provides accurate, fine and detail
printing.

Heated Chamber

Uniform heat distribution
chamber offers fine and tidy
layers.

Ease Of Used

An sd-card slot & LCD
displaying printing parameters,
it is a stand-alone printer.

Specifications

Technology Print Head Fused Deposition Modeling (FDM)

- 1)Print size: 220mm (W) x 220mm (L) x 240mm (H)
- 2)Nozzle diameter: 0.2 - 1mm (default 0.4mm)
- 3)Nozzle temperature: 180 - 260 °C
- 4)Nozzle heated time: Approx 2 min
- 5)Build plate: Heated glass build plate
- 6)Build plate temperature: 20 - 100 °C
- 7)Build plate heated time: Approx 5 min
- 8)Filament diameter: 1.75mm
- 9)Layer resolution: 60 um (may print at higher resolution)
- 10)Printable material: PLA, TPU, PLA Wooden, ABS ...etc
- 11)Machine Size: 380mm(W)x420mm(L)x450mm(H)
- 12)Machine Weight: 13kg
- 13)Power Consumption: 250 W

Features

- ✓ Printing Pause Function to enable user to change different filament(Example: Color).
- ✓ Heated Extruder Nozzel with cooling fan for operate in hot environment.
- ✓ Automatic Filament Feeding To extruder nozzle and removal of filament residue.
