

**Details :** Product Introduction

HR-150A Rockwell Hardness Tester is a universal hardnesss tester, mechanical manual test of the hardness ,no electrical device. It' s good economy and practicality, wide range usage, easy to operate etc.

**Specification**

Measurement Range	A.Scaleplate : 20-88HRA, Applicable to determination of metal hardness above70HRC ( such as hardness alloy , tungsten carbide ) ,hardish thin sheet, and parts after surface treatment B.Scaleplate : 20-100HRB Applicable to determination of softer metal and non-quenched steel C.Scaleplate : 20-70HRC Applicable to determination of heat treated steel parts
Initial Test Force	98.07N ( 10kgf )
Total Test Force	588.44N(60kgf ) 980.7N(100kgf) 1471N(150kgf)
Max. Height of Test Sample	170mm
Distance from Intentionation Center to Machine	135mm
Dimension	466×238×630mm
Net Weight	65kg
