

Home Inspector PRO 7-Piece Tool Kit

Detect and Troubleshoot Household Problems at Every Level

GSM100
Combustible Gas Leak Detector
Identifies the presence of combustible gases. Check for natural gas and propane leaks as well as paint thinners, industrial solvents, dry cleaning fluids & gasoline.

BR255
High Definition Videoscope
Inspect difficult to reach areas such as plumbing, electrical installations, behind walls, HVAC, ductwork, or check for pest infestation, check cable connections or anywhere else you need to see behind difficult to move objects.

MS150
Pin/Pinless Moisture Meter
The MS150 measures moisture content in wood (5 to 50%) and other building materials (1.5 to 33%). Quickly check for any hidden water damage and determine the relative moisture levels in drywall, wood, floors, or ceilings.

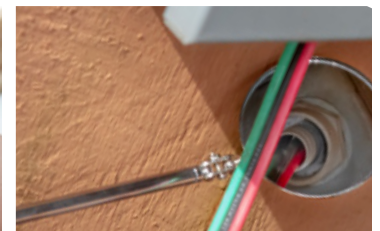

CBF200 3-in-1 Circuit Breaker Finder
Enables the safe identification of breaker locations within any electrical panel without removing power, check all your outlets for proper wiring, and test GFCI circuits for proper operation.

TMP10 Digital Pocket thermometer
Quickly measures the temperature of air, liquids and semi-solids. It's especially useful around the home for checking Hot/Cold water faucets, air vents or boiler, and its food-grade probe is even great for cooking.

IRT220 Non-Contact 12:1 Infrared Thermometer
Instantly measures an object's surface temperature without making contact. Use the IRT220 to check around doors and windows for air leaks or check your heating/cooling vents for proper operation.

TT-144 Telescoping Inspection Mirror
Inspect behind immovable objects and other hard to reach areas - inspect electrical or plumbing behind walls to check for leaks, wear, and loose fittings/connections.
