

MAGNETIC PIPE CUTTER

Features

There are two sets magnetic rollers built inside the machine body to keep the machine crawl on the pipe when cutting is operated. It can be used for parallel, vertical and face-down cutting. The machine features compact structure, stable running and easy operation. Optional steel belt assembly can be used to cut the big size pipe (Over Φ 600mm) to assure the cutting accuracy.

The Machine body is made of aluminium alloy to make the machine light and durable. The magnetic absorbability force is over 50kg and assures the machine attached to the pipe firmly. Bevel angle I, Y, V (45°).

Technical Specification

Effective pipe diameter : 108-600mm (Standard)
Bigger size with belt (Optional)

Power : AC220V

Pipe Thickness (mm) : 5-50

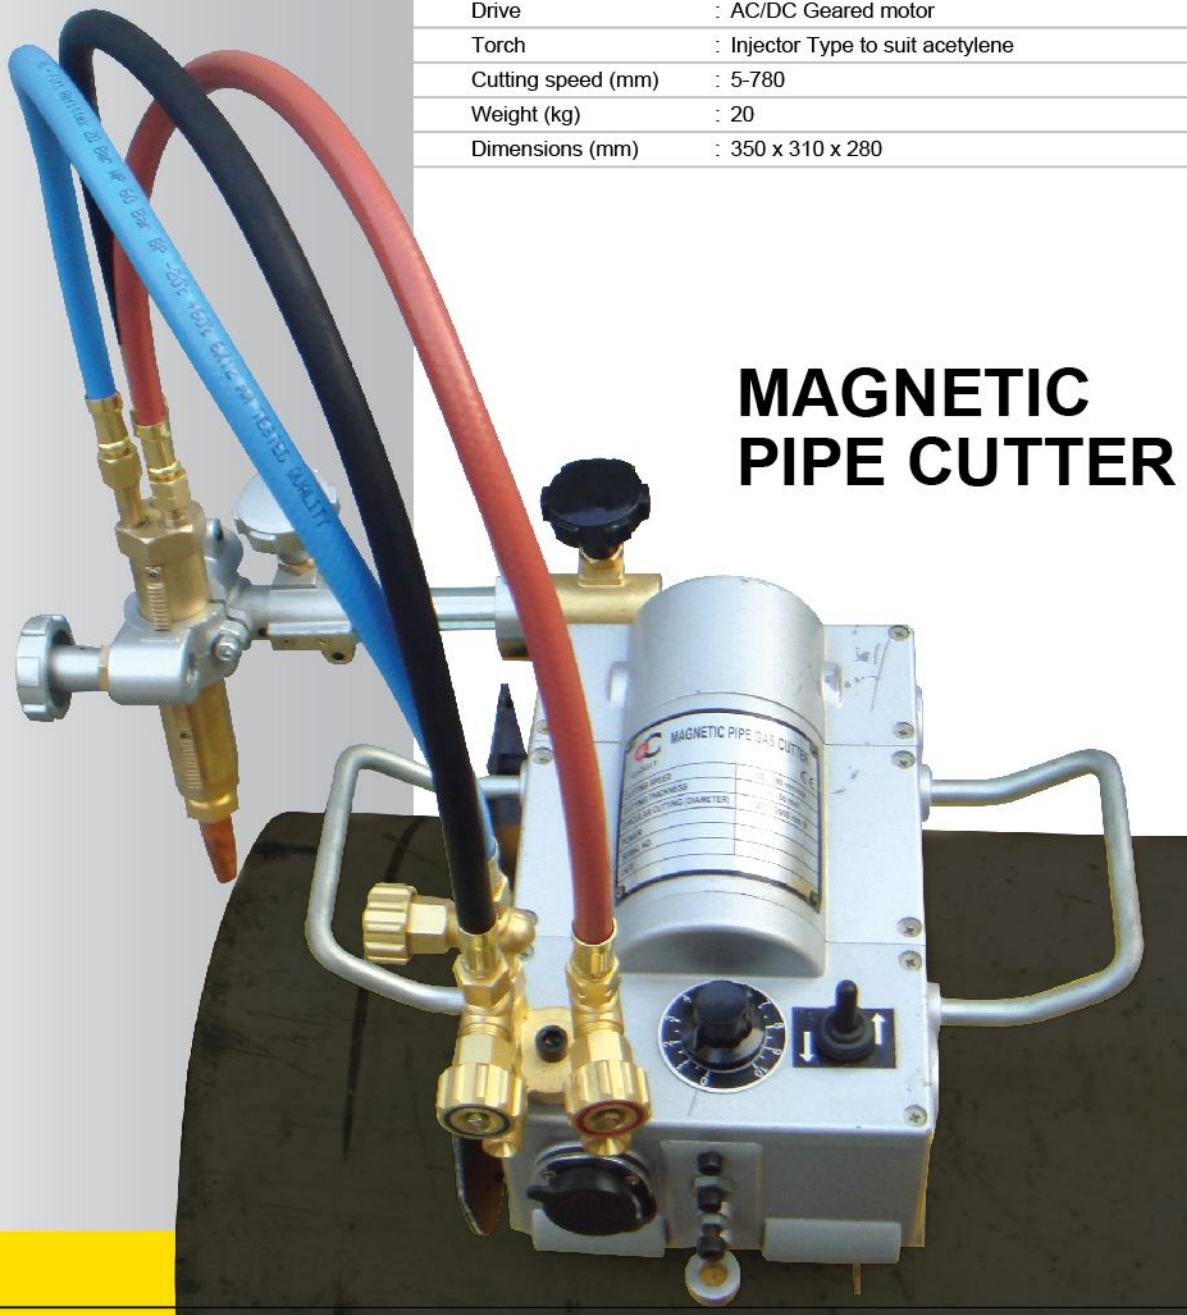

Drive : AC/DC Geared motor

Torch : Injector Type to suit acetylene

Cutting speed (mm) : 5-780

Weight (kg) : 20

Dimensions (mm) : 350 x 310 x 280
