LAQUA 200 Series

Handheld Water Quality Meters

Eco-friendly, Shock & Scratch Resistant, & Non-slip

Apart from their high impact strength, the polycarbonate and TPE materials are also longlasting and recyclable. The TPE provides nonslip grip and is not easily damaged by abrasion.

Backlit, Large LCD Screen

All models have scratchresistant monochrome digital LCD (50 x 50 mm) with white LED backlight for easy viewing of readings even in dark locations.

Hands-free Testing

Attach a wrist strap* or lanyard to hang the meter or place the meter into the carrying case while in use.

Meter shown in actual size

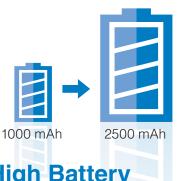

PC220

Built-in Electrode Holder

Two grooves on the meter serve as electrode holders.

Electrode adapter provides secure attachment for two electrodes so they can be easily placed in solutions.

High Battery Capacity

AA batteries have greater power capacity than AAA batteries. Battery life is increased by 2.5x.

9-Button Keypad **Minimal Matrix**

Operation buttons are reduced to the bare minimum.

Ergonomic

The black meter housing is made of polycarbonate material covered with a

layer of TPE material. It is

lightweight, comfortable to touch, and suitable for

field applications.

Design

1.0 mm Thermoplastic

elastomer (TPE)

Polycarbonate

Integrated Foldable Meter Stand

A collapsible meter stand is integrated at the back of the meter for convenient usage and storage.

IP67 Waterproof and Dustproof

Fully protected from dust and capable of withstanding water immersion up to 1 meter depth for 30 mins.

PC / Printer Communications

The 220 models are GLP-compliant: calibration and measurement data are captured with date and time stamp. Connect any 220 model to a computer using a PC (USB) cable¹ to transfer data via data acquisition software or to upgrade² meter software or connect to a HORIBA printer using a printer (RS232) cable¹ to print data.

- 1 Cables and printer are sold separately
- ² Also applicable to 210 models

Easy-to-Read Display

Electrode condition, reading stability, parameter, and temperature in one screen can be checked at a glance.

pH Display

Conductivity Display

Dissolved Oxygen Display

Calibration Data

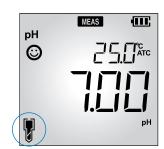

Simply press CAL button and then DATA button to view the latest calibration data.

Diagnostic Messages

Self-diagnosing meters display measurement and meter issues for fast fault finding and troubleshooting.

Electrode Status Indicator

The electrode icon indicates the condition of the electrode after each calibration.

Temperature sensor connected

Temperature sensor disconnected

Temperature Sensor Indicator

When the temperature sensor is connected to the meter, ATC is displayed. Otherwise MTC is displayed.

Measurement modes: Auto Stable, Auto Hold, Real Time

Auto Stable (AS) mode - the meter shows live readings; ② annunciator blinks until the reading is stable.

Auto Hold (AH) mode - the meter locks the stable reading; ② annunciator blinks until reading is stable and then HOLD lights up.

Real Time - the meter shows live readings; Both annunciators are inactive.

Part No.	Model	Description	
3014028368	X-51	Digital simulator for pH, mV, Ion, DO & temperature	
3014028370	X-52	Digital simulator for conductivity & temperature	
3014030146	-	Printer for GLP / GMP compliance, 120V US version (printer cable is sold separately)	
3014030147	-	Printer for GLP / GMP compliance, 230V EU version (printer cable is sold separately)	
3200779638	-	25-pin D-Sub Printer (RS232) cable (meter to printer), 1.5 m	
3014030149	-	Printer paper, 20 rolls	
3014030150	-	Printer ink ribbon, 5pcs/pack	
3200779640	-	Electrode adapter PC (LISB) cable with free data acquisition software in LISB	
3200779639	-	PC (USB) cable with free data acquisition software in USB flash drive to connect meter and computer, 1.5 m

With over 60 years of engineering excellence, HORIBA's diverse range of water quality analyzers and electrodes are ideal for everyday laboratory needs through to the most demanding of applications. Visit our website for a wealth of useful information and water quality measurement tips to help you obtain the best results in your work.

Benchtop Meters

Developed using extensive feedback from users, our new LAQUA meters deliver the best solution for water quality analysis. Our LAQUA website features an online 'Selection Guide' to enable you to find the perfect LAQUA meter and electrode for your needs.

Pocket Meters

Analyzing water quality is simplified when using our LAQUAtwin range of meters. Designed to produce accurate and reliable results. Anyone, anywhere, at any time can measure samples easily with a LAQUAtwin meter. See just how good they are at our website.

Electrodes

Various electrodes to match any application. A wide range of products for both benchtop and portable systems are available, including easy and reliable standard application-focused models, models for small samples or large containers, and special electrodes for specific sample characteristics.

Application Notes

LAQUAtwin pocket meters offer quick and convenient alternative to analyze important parameters with high accuracy. Several application notes are available at (http://goo.gl/znwE6j) detailing the use of LAQUAtwin and the results achieved for the respective applications. Additional application notes will be added when available.
