TOHNICHI - ATG / BTG Torque Gauge

Brand: Tohnichi - Japan Model: ATG / BTG Series

Features:

- Torque gauge series designed to measure low torque from 0.5mN m to 150cN m
- Two Body Sizes: ATG smaller and BTG larger coordinate with torque ranges.
- Bi-directional operation handheld type torque gauge.
- Aluminum Threaded keyless 3-jaw chuck is standard. (order replacement #00T45502B for ATG & #00T04282A for BTG)
 - For ATG: plastic chuck #322 or steel chuck #321 are also available as optional accessories
- Push lock button holds the gauge in place while securing test object in the chuck
- The dial is scaled by 270 degrees with a stopper which prevents over-loading.
- Includes plastic storage case and certificate of calibration
- For calibration, use calibration kits ATGTCL for ATG, and BTGTCL for BTG (sold separately) or contact our repair dept.
- Top and Side scales feature memory pointers to insure easy and accurate torque reading from different angles.

Part Number	Description	Application Models			
00T45502A	Plastic Chuck with Metal Teeth				
#322	All Plastic Chuck	All ATG Models			
#321	All Steel Chuck				

Notes

- 1. When measuring with the ATG/BTG (-S), be sure to clamp at least 10mm of the object to be measured inside the chuck.
- 2. Models 45ATG, ATG06Z and ATG045CN are only available without side and top memory pointers.

To purchase from Amazon click on model name

Standard accessories included

- 00T45502B Aluminum Chuck for ATG
- 00T04282A Aluminum Chuck for BTG
