

## K Type Thermocouple Probe AD-1217

### Spec

- \*Measurement range (thermosensitive part): -50 to +500°C
- \*Type of temperature sensor: K type thermocouple
- \*Structure: Exposure type, for surface measurement, Surface contact area
- \*Sensor cable length: About 560mm (in shortening, Polyurethane)
- \*Sensor unit dimensions: About  $\phi$ 15mm
- \*Handle part: About  $\phi$ 13 x L120mm (plastic, Heat resistance temperature 100°C)
- \*Accessories: Instruction manual
