

## PROSTAT – Audit Test Bed PTB-915

Model name	Art.-No. PTB-915
Manufacturing company	Prostat Corporation
Origin	United States of America
Classification name	ESD Resistance / Resistivity

### Audit Test Bed for Resistance Meters

- 3 x 6 inch metal plate
- 3 x 5.5 inch acrylic
- Both plates assembled into 1 plate
- Ideal for resistance measurements

The PTB-915 Audit Test Bed is a 3" x 6" for use with PRS-801 Resistance System, PRS-812 Resistance Meter or PAS-853 Resistance Audit System.

It is a versatile piece of equipment that can be used for multiple purposes.

Frequently, if you are making point to point measurements on either a worksurface or flooring, you can verify that your 5lb electrodes are functioning properly by testing their resistance on the conductive metal side of the PTB-915.

PGC-015G Green Ground Cord If you were to test materials such as packaging or tape reels you could use the PTB-915 and other probe attachments (such as a PRF-911, PRF-912B or PRF-922B) in conjunction with the PRS-801 or PRS-812.

For example, the insulative side would be used for testing resistance across two points of a material if it is placed on the test bed and two test points are made across the material.

### Technical Specification:

Characteristics	
Metal Plate Dimensions	3" X 6" (7.62 cm x 15.24 cm)
Acrylic Plate Dimensions	3" X 5.5" (7.62 cm x 13.97 cm)
Total Weight	5.4 oz (153g)
