

LD-A DIGITAL SHORE A DUROMETER

SUNDOO[®]
山 度 仪 器

LD-A数显式邵氏硬度计
LD-A Digital Shore Durometer

Introduction

LD-A Digital Shore Durometer is mainly used to measure the hardness of rubber material such as soft plastic, rubber, felt, leather and so on. This product integrates measuring equipment and data disposal with USB data output. It is compact in size, accurate in measurement, easy in carry, beautiful in design, and simple in operation. The durometer is widely used in chemical industry and scientific research.

Product Specification:

Test range	: 0~100 HA
Available test range	: 20~90 HC
Resolution	: ±1HA
Dimension	: L172×W60.5×H44.5 mm
Tip dimension	: Ø0.79mm
Weight	: Approx. 0.36kg
Power	: 800mAh Chargeable battery (The longest Charging time is 1.5 hours); Working time is about 500 hours.
