

SMART SENSOR – Hot-wire Anemometer
Brand: Smart Sensor
Model: AR866

PRODUCT INTRODUCTION:

Hot-wire Anemometer is a device used for measuring wind speed, and is a common weather station instrument. "Anemos", meaning wind, and is used to describe any air speed measurement instrument used in meteorology or aerodynamics.

Hot-wire Anemometers are widely used in different fields, such as heating, ventilation, air conditioning, environmental protection, energy conservation monitoring, meteorology, agriculture, refrigerating, drying, labour health survey, clean workshop, chemical fibre and textile, various aspects of wind laboratory, wide range of purposes.
