

## Goat & Sheep Skin Glove

### Technical Specification:

<b>Product Name</b>	<b>Polyester Cotton Goat/Sheep Skin Glove</b>
<b>Material</b>	Polyester Cotton with Goat/Sheep Skin
<b>Size</b>	Average size length is around 21.5cm with selectable size of S, M, L & XL
<b>Colour White</b>	(Goat/Sheep Skin) + Black (Polyester Cotton)
<b>Use</b>	Suitable for hand safety protection in oil-free Workplaces, and such as machinery manufacturing, ship building, metallurgy, forestry, ports, mines, construction, firefighting, loading and unloading, etc.
<b>Notice</b>	1) This product does not have high temperature resistance or insulation properties and cannot be used in places with high temperatures or where insulation is required. 2) Once this product is damaged, the protective effect will be affected, and it is not recommended to continue using it.
<b>Advantage</b>	1) Goatskin is slightly softer but tougher than cowhide. 2) It is economical, durable, thin yet strong and has a smooth, fine grain. It is also flexible and is water resistant and highly resistant to abrasion. It has a high natural oil content that makes goatskin very soft and pliable. 3) Would not leave any finger print on contact object.
