

Desktop Reactor LH-TX6

Water Quality
Analyzer Series

Product Introduction

LH-TX6 desktop reactor is a new design detection meter used with desktop water quality analyzer, it is widely used in the fields of electro-plating, sewage plant, coal carbonization, paper making, petrochemical, pelage, process hides, pharmacy, food processing, etc.

Two temperature control regions

Can reactor two water samples in different temp&time, save the time

Different operation mode

Touch key&button key can be used together or single

Features

Intelligent reactor
Temp reached timing will start

Wide range adjustment
Temp, mins can be adjusted in wide range

Safe and reliable
High temperature alarm function, full transparent integrated heat-resistant protective cover, intuitive and reliable

Technical Parameter

Operating Temperature	Temp Resolution	Temperature Range	Temperature Accuracy	Responding Time	Temperature Region	Capacity	Power Consumption	Display Screen	Power Supply
45~180°C	±0.1°C	45~180°C	±0.5°C	0-120mins	2(two temperature regions can be set)	16 vials (8+8)	<300W	4.3inch color screen	DC 24V/12A
