About Us

LG Refrigeration Sdn Bhd is a Commercial Refrigeration System Specialist. We provide temperature control solutions for every market segment. Our comprehensive start to finish services (consultancy, design, supply, installation and maintenance) will cover all client requirements. LG Refrigeration gives you a professional, one-stop solution for all your refrigeration needs that can ensure complete project and after-sale accountability.

Based in Kuala Lumpur, LG Refrigeration has over 30 years of experience in refrigeration systems and cold room installations. Our service team is efficient, knowledgeable and is kept up to date with the latest developments in cold room technology and techniques. We take pride in giving our customers top quality service and products.

Our Projects

A selection of past projects from our growing clientele list.

Our Maintenance Service

LG Refrigeration's proactive maintenance team will ensure that your cooling system is always running at its best and during emergency breakdowns, we are very quick to respond. Our highly qualified technicians will help you get up and running fast. Customer satisfaction is our priority.

Cold Room Design and Build

We design and build cold rooms to suit your requirements. Good quality components are used in every aspect of the build for optimum performance and maximum lifecycle. Our highly experienced installers will make the build process seamless and fault free. A 3 year warranty is provided by us that will ensure your business runs smoothly.

Refrigeration System

The refrigeration system we utilize for our cold rooms are made with high quality components. We use ISO certified, international quality heat exchangers with the latest design and heat transfer technology. Our refrigeration system gives highly respectable performance that delivers a longer lifecycle while maintaining its cost effectiveness.

Cold Room Refurbishment

We regularly carry out cold room refurbishments for clients with existing facilities. Repairing and improving existing systems are all part of our service. No job is too big or small; we even refurbish commercial fridges, freezers and ice machines for our clients.

Skilled Workforce

Our technicians have more than 30 years of experience in the cold room industry and we keep them up to date with current techniques and technology. We leave nothing to chance; technical competency is a requirement for LG Refrigeration.
