### IV Wall Hooks

#### Slow Return function slowly retracts the hook.

For easier removal of intravenous bottles or bags, the hook retracts slowly so that it does not impede the hand.

Allowable load: 10 kg (22 lb)

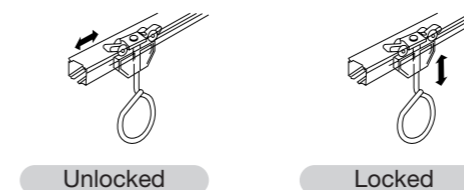

#### Precautions when mounting IV Hooks

\*Securely attach each hook with two of the supplied 3.5 mm (.14") x 25 mm (.98") pan-head screws.  
\*To assure hooks remain firmly attached, mount on plywood at least 12 mm (.47") thick or on another substrate of the same thickness.

### Precautions Concerning IV Hooks

\*Securely attach each hook with three of the supplied 4.0 mm (.16") x 40 mm (1.6") pan-head screws.

The weight of an IV bottle causes the runner to lock, but it unlocks if the IV hanger is gently lifted, allowing the runner to move smoothly. Special plastic used for the runner wheels assures the runners are extremely quiet.

<Fixed type> <30GN fixed type>

#### 30GN fixed type features

\*As a safety feature, the hook comes apart for when loads of 30kg (66lb) or more are applied.  
\*Be aware that even with loads lighter than 30kg, dynamic load may cause a hook to become detached.
