

RADIATOR SEALER & CONDITIONER

Spanjaard Radiator Sealer & Conditioner is designed to protect the cooling system from corrosion and seal the entire cooling system should small leaks occur.

APPLICATIONS

Spanjaard Radiator Sealer & Conditioner seals small radiator leaks and stops head gasket seepage. It prevents rust and scale formation in aluminium and cast-iron engines, lubricates the water pump and protects hoses and pressure caps.

It is compatible with all superior anti-freeze/coolant solutions for all types of cooling systems with 375ml treating systems up to 10 litre coolant capacity.

APPLICATION INSTRUCTIONS

(For best results, first clean cooling system with Spanjaard Radiator Flush)

1. Drain off 375ml from radiator.
2. Shake bottle and add slowly to cool radiator while engine is running.
3. Replace cap and run engine until warm to ensure even distribution.

TYPICAL PROPERTIES

Colour	Red
Density, g/ml	1,05

HANDLING AND STORAGE

CAUTION: Causes serious eye irritation. Avoid contact with skin and eyes, rinse immediately with plenty of water and seek medical advice. Keep out of reach of children.
