

Beacon Voltage Detectors

The Beacon range of Voltage Detectors from PBweir is available in a range of 5-12kV or 10-36kV.

The Beacon is designed for both indoor and outdoor use as the circuitry is housed within a durable plastic moulded body.

With an audible alarm, and visible warning light, the Beacon is simple to use, and is suitable in poor visibility.

The unit is a capacitive type and does not require a down-lead, which greatly reduces the risk to the operator caused where fault protection can be grounded.

Benefits

- Built-in Test Facility
- Battery Operated (easy to change)
- Rugged construction
- Lightweight

Supplied with

- Durable Case
- Y Contact Probe
- Universal Castellated Adaptor
- Long Taper Operating Socket Adaptor
