

MYSCAD PROFESSIONAL

Top series of MYSCAD product range that deliver the full module with Geomatic, Survey Application, Engineering, Design, Cad & 3D Drafting, Texture Support with powerful 3D rendering for professional engineer, mechanical application, CAD & CAM needs.

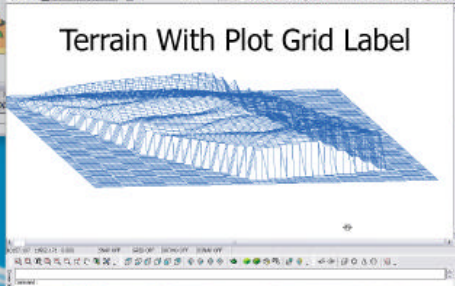

Earth Work Design

Tower Design

Terrain With Plot Grid Label

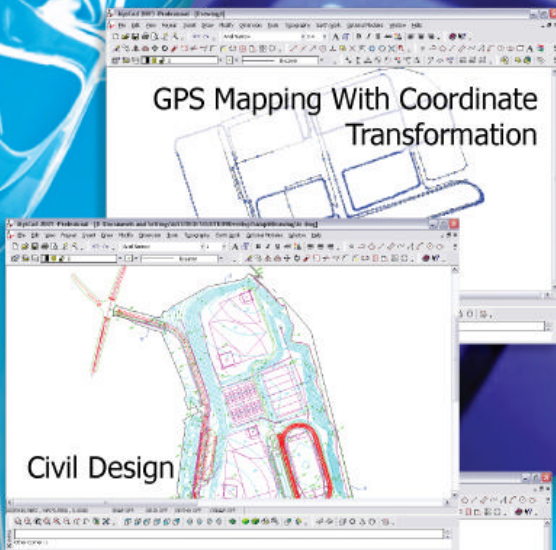

Multiple Long Section Profile

F2F Topo Reduction Calculation

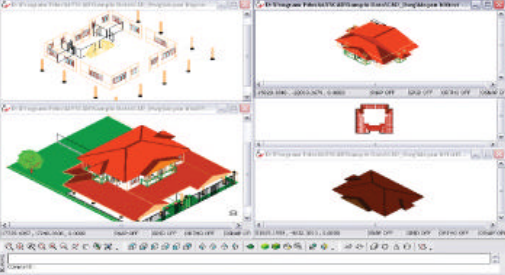

Station	Height	Width	Area	Volume
0+00	10.00	10.00	100.00	0.00
0+10	12.00	12.00	144.00	144.00
0+20	14.00	14.00	196.00	588.00
0+30	16.00	16.00	256.00	1296.00
0+40	18.00	18.00	324.00	2592.00
0+50	20.00	20.00	400.00	4000.00
0+60	22.00	22.00	484.00	5544.00
0+70	24.00	24.00	576.00	7164.00
0+80	26.00	26.00	676.00	8864.00
0+90	28.00	28.00	784.00	10644.00
1+00	30.00	30.00	900.00	12500.00

GPS Mapping With Coordinate Transformation

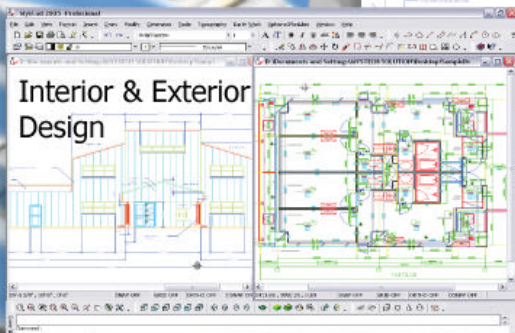

Civil Design

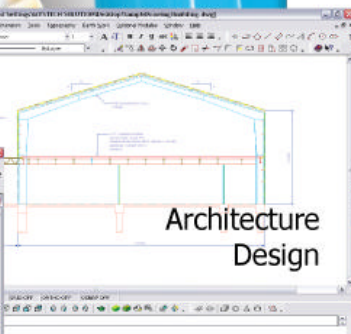

3D Design & Drafting

Interior & Exterior Design

Architecture Design

Cadastral Survey

MYSCAD PROFESSIONAL

Remarks : AutoCad is the trademark of Autodesk

Top series of MYSCAD product range that deliver the full module with Geomatic, Survey Application, Engineering, Design, Cad & 3D Drafting, Texture Support with powerful 3D rendering for professional engineer, mechanical application, CAD & CAM needs

→ FEATURES

- ☒ Dual Language In One Cad Platform System.
- ☒ Integrated Survey, Geometric and CAD drafting -Download, Calculate, Design, Draft, Check and Print - all incorporated into a productive field-to-finish package.
- ☒ AutoCAD Compatible: MYSCAD is compatible with international CAD standards.
- ☒ More than 1000 Cad functions and key board command available.
- ☒ Customizable User Interface and commands.
Toolbars - can be arranged with "drag and drop" functionality .
Menus - can be re-organized with our graphical menu editor.
Screen - items can be turned off for more graphics area.
Layout - of command window - top or bottom and etc.
- ☒ Extra Tools, Edit, Modify, Update, Hatches, Notes, and Dimensions, Create Layouts and Plot Drawings.
- ☒ Share Data Between Drawings and Applications.
- ☒ The system is totally graphical and user configurable, giving the user complete control over the configuration for unit types, colors, attribute data, and feature display etc.

→ GEOMATIC KEY BENEFITS

- ☒ Full COGO capability from field to finish.
- ☒ Create topographic maps using intelligent mapping from data collector.
- ☒ Enhanced compatibility with most brands survey products.
- ☒ Import and export ASCII, DXF, DWG, VDI, VDF, JPG, WMF, BMP and other industry standard formats.
- ☒ Ability to view and plot image files as a background for design data. Typical uses include the incorporation of aerial photographs, satellite imagery, and scanned images used as a backdrop for the location of existing or proposed features.
- ☒ Support Dynamic Link Between CAD drawing and Topographical Survey Data, Cadastral Survey Calculation Result.
- ☒ Support Earth Work Engineering, Long Section & Cross Section Profile and Volume Calculation.
- ☒ Support Terrain Modeling and contouring with 3D auto dynamic roaming ability.
- ☒ Support Water Level Analysis with Grid Base modeling & labeling abilities.
- ☒ Provide Various Engineering Calculation with multiple mathematic models.
- ☒ Profile, Cross section template editor, profile plotting & vertical alignment design Civil Design Tools on Earth Work Design, Road Design & Lot Design.
- ☒ Provides a full double precision point based coordinate geometry database, resulting in improved accuracy and data integrity.
- ☒ Delivers true designed-in support for the design conventions and geometric features commonly employed by industry professionals.
- ☒ Provides numerous key features that are unmatched by any other CAD environment and solves the most common and frustrating drafting production problems.

Authorized Dealer
